Wang, T., Zheng, J., Cai, J., Liu, Q., & Zhang, X. (2022). Visible-light-driven photocatalytic degradation of dye and antibiotics by activated biochar composited with K+ doped g-C3N4: Effects, mechanisms, actual wastewater treatment and disinfection. *Science of the Total Environment*, *839*(May), 155955. https://doi.org/10.1016/j.scitotenv.2022.155955

Yu, Y., Chen, D., Xu, W., Fang, J., Sun, J., Liu, Z., Chen, Y., Liang, Y., & Fang, Z. (2021). Synergistic adsorption-photocatalytic degradation of different antibiotics in seawater by a porous g-C3N4/calcined-LDH and its application in synthetic mariculture wastewater. *Journal of Hazardous Materials*, *416*(February), 126183. https://doi.org/10.1016/j.jhazmat.2021.126183

Zourou, A., Ntziouni, A., Karagianni, A., Alizadeh, N., Argirusis, N., Antoniadou, M., Sourkouni, G., Kordatos, K. V, & Argirusis, C. (2025). *Recent Advances in Carbon Dots-Based Photocatalysts for Water Treatment Applications*. 1–48.

Zuo, W., Yu, Y., & Huang, H. (2021). Making waves: Microbe-photocatalyst hybrids may provide new opportunities for treating heavy metal polluted wastewater. *Water Research*, *195*, 116984. https://doi.org/10.1016/j.watres.2021.116984
