ABSTRACT xv

CHAPTER
I. INTRODUCTION
1.1. Background 1
1.2. Problem Statement 7
1.3. Objectives 8
1.4. Benefit 10
1.5. Authenticity of The Study 10

II. REVIEW OF LITERATURE AND THEORETICAL BASIS
2.1. Review of Literature 12
2.1.1. Rubber Plant 12
2.1.2. Rubber Leaf Diseases 14
2.1.3. Pathogens Identification Based on Morphological and Molecular Analysis 20
2.1.4. Genetic Diversity of The Pathogen 26
2.1.5. Metagenomics Analysis 32
2.2. Theoretical Basis 36
2.3. Hypothesis 41

III. MATERIALS AND METHODS
3.1. Time and Location 43
3.2. Materials 43
3.3. Isolates Collection, Pathogenicity Test and Identification 44
3.3.1. Pathogen Isolation and Preservation 44
3.3.2. Single Spore Isolation 45
3.3.3. Pathogenicity Test on Detached Leaflets of Rubber 46

UNIVERSITAS
GADJAH MADA
Identification and Pathogen Diversity of New Emerging Leaf Fall Disease on Rubber (Hevea brasiliensis (Willd. ex A.Juss.) MÃ¼ll.Arg.) in Indonesia
Budi Setyawan, Prof. Dr. Ir. Siti Subandiyah, M.Arg.Sc.; Dr. Ir. Arif Wibowo, M.Agr.Sc.; ValÃ©rie Pujade-Renaud, PhD
Universitas Gadjah Mada, 2026 | Diunduh dari http://etd.repository.ugm.ac.id/

3.3.4. Grouping of The Pathogen Isolates Based on Morphometric Variation 48
3.3.5. Pathogen Identification using Multigenic Sequence Analysis 50
- DNA extraction 50
- PCR amplification 51
- DNA sequencing and analyses 53
3.4. Grouping of Pathogen Isolates 54
3.4.1. Grouping of Pathogen Isolates Based on rep-PCR 54
3.4.2. Grouping of Pathogen Isolates Based on Virulence 56
3.4.3. Grouping of Pathogen Isolates Based on ITS, ß-tubulin, and TEF1 Sequence Polymorphism 59
3.5. Amplicon Metagenomic Analysis on Diseased Leaf of Rubber Tree 61
- ITS Amplicon Sequencing, Community Profiling, and Functional Annotation of Combined Rainy- and Dry-Season 67

IV. RESULTS AND DISCUSSION
4.1. Identification and Characterization of The Disease 69
4.1.1. Sampling of diseased rubber leaves 69
4.1.2. In situ observations 71
4.1.3. Isolates collection 72
4.1.4. Pathogenicity test on detached rubber leaflets 78
4.1.5. Multigenic identification 84
- Multigene phylogeny based on ITS and β-tubulin 85
- Species identified and their taxonomic placement 88
- Confirmation of the causal agents of new emerging leaf fall disease 93
- Implications for the research hypothesis 95
4.2. Diversity 96
4.2.1. Diversity based on rep-PCR 96
- Diversity and structure across locations and clones 103
- Relationship to previous rep PCR and diversity studies 104
4.2.2. Diversity based on multigenic analysis 106
- Multigene phylogeny and overall topology 107
- Diversity and structure within *Neopestalotiopsis* 109
- *Pseudopestalotiopsis* and *Pestalotiopsis* lineages 110
- *Colletotrichum siamense* clade 111
- Comparison with rep PCR clustering 112
- Implications for pathogen diversity and disease management .. 113

UNIVERSITAS
GADJAH MADA
Identification and Pathogen Diversity of New Emerging Leaf Fall Disease on Rubber (Hevea brasiliensis (Willd. ex A.Juss.) MÃ¼ll.Arg.) in Indonesia
Budi Setyawan, Prof. Dr. Ir. Siti Subandiyah, M.Arg.Sc.; Dr. Ir. Arif Wibowo, M.Agr.Sc.; ValÃ©rie Pujade-Renaud, PhD
Universitas Gadjah Mada, 2026 | Diunduh dari http://etd.repository.ugm.ac.id/

4.2.3. Diversity based on morphometrics 116
- *Neopestalotiopsis aotearoa* 117
- *Neopestalotiopsis cubana* 118
- *Neopestalotiopsis olumideae* 119
- *Neopestalotiopsis thailandica* 120
- *Pestalotiopsis diploclisiae* 120
- *Pseudopestalotiopsis elaeidis* 122
- *Colletotrichum siamense* 123
- *Lasiodiplodia theobromae* 124
- Morphometric diversity and taxonomic implications among Sporocadaceae and related fungi 125

4.2.4. Diversity based on virulence 126
- Overall virulence diversity 127
- Distinct outlier phenotype (SsB1/SuE145) 128
- Major symptom clusters across locations and clones 128
- Cluster of PB 260–associated symptom types 129
- Implications for phenotypic characterization 130

4.2.5. Implications for the research hypothesis 131
4.3. ITS Amplicon Metabarcoding 135
4.3.1. Beta diversity analysis 135
4.3.2. Alpha diversity analysis 139
4.3.3. Comparison with amplicon metabarcoding sampling at dry season 152
- Integrated seasonal interpretation 163

4.3.4. Integrated alpha and beta diversity of combined rainy- and dry-season phyllosphere communities 164
4.3.5. Spatiotemporal dynamics and functional turnover of fungal communities in the rubber tree phyllosphere 171
4.3.6. Implications for the research hypothesis 175

V. CONCLUSION AND SUGGESTION
5.1. Conclusion 179
5.2. Suggestion 179
