

ABSTRAK

Latar Belakang : RSKB Sinduadi Yogyakarta merupakan rumah sakit yang sudah melaksanakan akreditasi pertama kalinya pada Desember 2018 tetapi belum mengajukan Bab MIRM untuk diakreditasi. Oleh karena itu diperlukan penelitian mengenai pengelolaan rekam medis yang terdapat pada standar MIRM 8 SNARS.

Tujuan : Menjelaskan pemenuhan elemen penilaian MIRM 8 dalam rangka persiapan menyempurnakan akreditasi SNARS di unit rekam medis RSKB Sinduadi Yogyakarta.

Metode : Jenis penelitian adalah deskriptif kualitatif dengan rancangan penelitian fenomenologi. Subjek penelitian ini adalah dua orang petugas rekam medis dan direktur rumah sakit. Objek dalam penelitian ini yaitu kebijakan, SPO, dan program. Teknik pengumpulan data dengan wawancara, observasi, dan studi dokumentasi. Uji keabsahan data dengan triangulasi.

Hasil : Pengelolaan rekam medis berdasarkan elemen penilaian 1, 2, dan 3 dari MIRM 8 terpenuhi sebagian.

Kesimpulan : Pemenuhan elemen penilaian standar MIRM 8 dalam rangka menyempurnakan akreditasi SNARS di unit rekam medis RSKB Sinduadi Yogyakarta terpenuhi sebagian. Rumah sakit sebaiknya memiliki kebijakan, panduan, dan program terkait pengelolaan rekam medis serta memiliki Surat Keputusan terkait koordinator rekam medis.

Kata Kunci : akreditasi SNARS, pengelolaan rekam medis, standar MIRM 8.

ABSTRACT

Background : RSKB Sinduadi Yogyakarta is a hospital that is carrying out its first accreditation RSKB Sinduadi Yogyakarta is a hospital that has implemented its first accreditation in December 2018 but has not submitted a MIRM Chapter to be accredited. Therefore research is needed on the management of medical records contained in the SNARS 8 MIRM standard.

Purpose : Explain the fulfillment of the elements of the MIRM 8 assessment in preparation for perfecting SNARS accreditation in the RSKB Sinduadi Yogyakarta medical record unit.

Methods : The type of research is descriptive qualitative with phenomenological research design. Subjects in this study were two medical record officers and hospital directors. The objects in this study are policies, SPO, and programs. The technique of collecting data is by interview, observation, and documentation study. Test the validity of data by triangulation.

Result : Management of medical records based on assessment elements 1, 2, and 3 of MIRM 8 is partially fulfilled.

Conclusion: Fulfillment of the evaluation elements of the MIRM 8 standard in order to improve SNARS accreditation in the medical record unit of RSKB Sinduadi Yogyakarta is partially fulfilled. Hospitals should have policies, guidelines, and programs related to medical record management and have a Decree related to the medical record coordinator.

Keywords : SNARS accreditation, medical record management, MIRM standard 8.
