This research implemented three scenarios (worst case, normal case, and best case) to describe the possible recovery time of the research object from the impact of the Covid-19 pandemic.

The reconciliation results of the free cash flow to equity method, and relative valuation (PBV) after the discount for lack of marketabilities applied, showed the fair value of PT Bank Permata Tbk is in the range of Rp.1,491.00 to Rp.1,544.00 per share.
