|---|-------|
| TESIS .....   | i     |
| LEMBAR PENGESAHAN .....   | iii   |
| PERNYATAAN ORIGINALITAS .....   | iv    |
| PERSEMBAHAN .....   | v     |
| DAFTAR ISI .....  | vi    |
| DAFTAR TABEL .....  | ix    |
| DAFTAR GAMBAR.....  | x     |
| ABSTRACT.....   | xvii  |
| INTISARI .....  | xviii |
| BAB I PENDAHULUAN.....  | 1     |
| 1.1. Latar Belakang .....   | 1     |
| 1.2. Perumusan Masalah.....   | 2     |
| 1.3. Batasan Masalah .....  | 3     |
| 1.4. Tujuan Penelitian .....  | 3     |
| 1.5. Manfaat Penelitian .....   | 3     |
| 1.6. Keaslian Penelitian.....   | 4     |
| BAB II TINJAUAN PUSTAKA .....   | 5     |
| 2.1. Material <i>Viscoelastic</i> .....                               | 5     |
| 2.2. <i>Maxwell Model</i> .....                                       | 5     |
| 2.3. <i>Kelvin-Voigt Model</i> .....                                  | 6     |
| 2.4. <i>Burger Model</i> .....  | 7     |
| 2.5. <i>Creep Dan Shrinkage Pada Usia Dini</i> .....                  | 8     |
| 2.6. <i>Perilaku Creep Dan Shrinkage Pada Hardened Concrete</i> ..... | 12    |
| 2.7. <i>Long-Term Creep and Shrinkage</i> .....                       | 15    |
| 2.8. Teori Dasar <i>Creep dan Shrinkage</i> .....                     | 33    |
| 2.8.1. <i>Creep</i> .....   | 33    |
| 2.8.2. <i>Shrinkage</i> .....   | 38    |
| BAB III LANDASAN TEORI .....  | 41    |
| 3.1. Kuat Desak Beton.....  | 41    |
| 3.2. CEB-FIP 2010.....  | 41    |
| 3.2.1. Modulus Elastisitas.....                                       | 41    |
| 3.2.2. <i>Creep</i> .....   | 41    |

|                                 |  |     |
|---------------------------------|--|-----|
| 3.2.3.                          | <i>Shrinkage</i> (susut).....  | 42  |
| 3.3.                            | ACI 318-05 (2008) .....  | 43  |
| 3.3.1.                          | Modulus Elastisitas .....  | 43  |
| 3.3.2.                          | <i>Creep</i> (rangkak) .....   | 43  |
| 3.3.3.                          | <i>Shrinkage</i> (susut).....  | 44  |
| 3.4.                            | EN-1992-1-1-2004 .....   | 44  |
| 3.4.1.                          | <i>Creep</i> (rangkak) .....   | 44  |
| 3.4.2.                          | <i>Shrinkage</i> (susut).....  | 45  |
| 3.5.                            | AASHTO LRFD (2010) .....   | 46  |
| 3.5.1.                          | <i>Creep</i> (rangkak) .....   | 46  |
| 3.5.2.                          | <i>Shrinkage</i> (susut).....  | 46  |
| 3.6.                            | Bazant B3 (2000) .....   | 47  |
| 3.6.1.                          | <i>Creep</i> (rangkak) .....   | 47  |
| 3.6.2.                          | <i>Shrinkage</i> (susut).....  | 48  |
| BAB IV METODE PENELITIAN .....  |  | 49  |
| 4.1.                            | Prosedur Penelitian .....  | 49  |
| 4.2.                            | Data Penelitian .....  | 49  |
| 4.3.                            | Alat Penelitian .....  | 50  |
| 4.4.                            | Pembebanan.....  | 51  |
| 4.5.                            | Parameter Penelitian .....   | 52  |
| 4.6.                            | Pemodelan Jembatan .....   | 53  |
| 4.7.                            | Metode Analisis .....  | 56  |
| BAB V HASIL DAN PEMBAHASAN..... |  | 58  |
| 5.1.                            | <i>Compliance Creep</i> dan <i>Shrinkage</i> .....                       | 58  |
| 5.2.                            | <i>Displacement</i> Dan Tegangan Pada Saat Konstruksi.....               | 59  |
| 5.2.1.                          | <i>Displacement balanced cantilever</i> .....                            | 59  |
| 5.2.2.                          | Tegangan <i>Balanced Cantilever</i> .....                                | 72  |
| 5.2.3.                          | <i>Displacement</i> Dan Tegangan Konstruksi Setelah <i>Closure</i> ..... | 75  |
| 5.2.3.1.                        | <i>Displacement</i> setelah <i>closure</i> .....                         | 75  |
| 5.2.3.2.                        | Tegangan konstruksi pada saat <i>closure</i> .....                       | 85  |
| 5.2.4.                          | <i>Camber</i> setelah selesai konstruksi .....                           | 89  |
| 5.3.                            | <i>Displacement</i> Dan Tegangan Pada Jangka Panjang.....                | 90  |
| 5.3.1.                          | <i>Displacement</i> Model B3 .....                                       | 90  |
| 5.3.2.                          | <i>Displacement</i> Model CEB 2010.....                                  | 102 |
| 5.3.3.                          | <i>Displacement</i> Model <i>European</i> (EN) .....                     | 114 |

|                               |   |            |
