ANALISIS SUMBER PENGHIDUPAN NELAYAN PANTAI BARON KABUPATEN GUNUNGKIDUL

Penelitian ini bertujuan untuk mengidentifikasi sumber penghidupan yang dimiliki dan diakses nelayan, mengetahui permasalahan yang dihadapi oleh nelayan terkait pengelolaan sumber penghidupan nelayan, dan mengetahui strategi pemanfaatan sumber penghidupan nelayan. Penelitian ini dilakukan pada bulan Desember 2021 – Januari 2022 dengan menggunakan metode survei dan mengambil sampel sebanyak 36 responden nelayan. Hasil penelitian menunjukkan bahwa nelayan Pantai Baron memiliki lima aset sumber penghidupan. Aset alam berupa air bersih (100%), kepemilikan lahan pertanian dan peternakan (33%), pandangan ketersediaan sumberdaya ikan (100%). Aset fisik fasilitas umum (71,43%) dan aset fisik pribadi berupa kepemilikan rumah (100%), kendaraan (100%), sarana komunikasi (100%), kapal (64%), alat tangkap ikan (64%), alat bantu penangkapan ikan (61%). Aset manusia terdiri dari anggota keluarga yang bekerja (100%), keterampilan khusus bidang perikanan (26%), keterampilan diluar bidang perikanan (89%), keikutsertaan pelatihan keterampilan (33%), asuransi kesehatan (100%). Aset finansial berupa pinjaman dan tabungan bank pemerintah (69%), pinjaman dan tabungan bank swasta (22%), pinjaman dan tabungan arisan (97%) tabungan uang (97%), emas dan perhiasan (64%), hutang (94%). Aset sosial antara lain organisasi masyarakat (100%), kegiatan keagamaan (89%), gotong royong (100%) dan arisan (97%). Permasalahan yang dihadapi adalah ancaman alam, musim paceklik (67%), alat tangkap hilang dan rusak (64%), ketersediaan BBM (61%), harga ikan (97%), biaya penangkapan ikan (86%), pemasaran ikan (89%), harga BBM (92%). Strategi yang dilakukan nelayan Pantai Baron adalah tidak melakukan penangkapan ikan (69%), penangkapan lebih awal (78%), ekstensifikasi (72%), diversifikasi (92%), membeli alat tangkap baru (83%), menjual cepat tangkapan (97%), membawa es (75%), menyimpan cadangan BBM (89%).
