DECLARATION OF AUTHENTICITY	iii
LEGISLATION LETTER	iv
SHEET OF DEDICATION.....	v
ACKNOWLEDGEMENTS.....	vi
PREFACE.....	ix
TABLE OF CONTENTS.....	xiii
LIST OF TABLES	xiii
LIST OF FIGURES	xiii
ABSTRACT	xiv
INTISARI	xv
CHAPTER 1 Introduction	1
1.1. Background.....	1
1.2. Objectives of the Study.....	5
1.3. Advantages of The Study.....	5
1.4. Scope and Limitation of The Study	5
CHAPTER 2 Literature Study	7
2.1. Chemical Components Present in Arabica Coffee Beans.....	7
2.2. Types of Coffee Processing.....	9
2.3. Fermentation During the Wet Processing Method of Coffee.....	12
2.4. Roles of Microbial Starters in Coffee Processing.....	14
2.5. <i>Wickerhamomyces anomalus</i> in Coffee Processing	17
2.6. Physicochemical Properties and Changes of Chlorogenic Acid During Coffee Fermentation.....	18
CHAPTER III Research Methodology	22
3.1. Research Setting	22
3.2. Materials.....	22

3.2.1. Microorganisms	22
3.3. Methods	25
3.4. Data Analysis	30
CHAPTER 4 Results and Discussion	31
4.1. Microbial Growth and pH Changes During Fermentation Inoculated with <i>Wickerhamomyces anomalus</i> Yeast Starters.....	31
4.2. Changes in the pH Value and Total Acid of the Arabica coffee beans fermented with the addition of <i>Wickerhamomyces anomalus</i> Starters.....	41
4.3. Changes in the Chlorogenic Acid Content of Coffee Beans Fermented with <i>Wickerhamomyces anomalus</i> Yeast Starters.....	46
4.4. Flavor Compounds Present in Coffee Beans Fermented with <i>Wickerhamomyces anomalus</i> Yeast Starters.....	49
4.5. Pectinolytic Activity of <i>Wickerhamomyces anomalus</i>	52
CHAPTER 5 Conclusion and Future Study	56
5.1. Conclusion	56
5.2. Future Study.....	56
REFERENCES.....	58
APPENDIX	66
1. Documentation of Microbial Platting.....	66
2. Microbial Cell Count Obtained Through Platting.....	75
3. Mean of Two Microbial Profile Data (Two Batches)	80
4. Documentation of <i>Wickerhamomyces anomalus</i> Cell Count using Haemocytometer	80
5. pH and Total Acid of Fermentation Medium Raw Data.....	80
6. pH and Total Acid of Green Coffee Beans Raw Data	83
7. Chlorogenic Acid Raw Data.....	85
8. SPSS Statistics Analysis of the pH Value and Total Acid in Coffee Beans.....	85
<u>Total Acid Control</u>	85

LIST OF TABLES

Table 1 Chemical composition of Arabica green and roasted coffee beans	8
Table 2 Composition of media used in the research	21
Table 3 Flavor and volatile compounds produced by <i>Wickerhamomyces</i> <i>anomalus</i> and yeasts from <i>Pichia</i> genus	47
Table 4 Properties of pectinolytic enzymes produced by <i>Wickerhamomyces</i> <i>anomalus</i> from different sources	49

LIST OF FIGURES

Figure 1. Steps involved in dry (left) and wet (right) coffee processing	11
Figure 2. Chlorogenic acid (5-CQA) structure (Izawa, et al., 2010)	18
Figure 3. Research Process	23
Figure 4 Chlorogenic acids concentration of green (GB) and roasted (R) coffee beans with and without (C) ($p > 0.05$)	42
Graph 1. Trends of microflora growth during 48 hours of fermentation without inoculation (Control – left) and with <i>Wickerhamomyces anomalus</i> inoculation (WA – right). Data presented is the mean of two experimental batches ($n = 2$)	28
Graph 2. Changes in pH and Total Acid Value of Coffee Fermentation with (WA) and without (control) <i>Wickerhamomyces anomalus</i> starters	33
Graph 3 Changes of pH Value and Total Acid in Fermented Green Coffee with (WA) and without (control) <i>Wickerhamomyces anomalus</i> inoculation.....	38
