| | |
|--|------|
| HALAMAN SAMPUL | i |
| LEMBAR PENGESAHAN | iii |
| LEMBAR PERNYATAAN | iv |
| KATA PENGANTAR | v |
| INTISARI..... | vi |
| ABSTRACT..... | vii |
| DAFTAR ISI..... | viii |
| DAFTAR TABEL..... | xi |
| DAFTAR GAMBAR | xii |
| BAB I PENDAHULUAN | 1 |
| 1.1. Latar Belakang | 1 |
| 1.2. Rumusan Masalah..... | 3 |
| 1.3. Tujuan Penelitian | 3 |
| 1.4. Batasan Masalah | 3 |
| 1.5. Manfaat Penelitian | 4 |
| 1.6. Keaslian Penelitian..... | 4 |
| BAB II TINJAUAN PUSTAKA..... | 6 |
| 2.1. Tempat Pemrosesan Akhir (TPA)..... | 6 |
| 2.2. Pengertian Lindi..... | 7 |
| 2.3. Karakteristik Lindi | 7 |
| 2.4. Pengertian <i>Constructed Wetland</i> | 8 |
| 2.5. Tipe <i>Constructed Wetland</i> | 9 |
| 2.5.1. <i>Surface Flow (SF)/Free Water Surface (FWS)</i> | 9 |
| 2.5.2. <i>Sub-Surface Flow (SSF)</i> | 9 |
| 2.6. Fitoremediasi..... | 10 |
| BAB III LANDASAN TEORI..... | 13 |
| 3.1. <i>Horizontal Sub-Surface Flow (HSSF) Constructed Wetland</i> | 13 |
| 3.2. Parameter Lindi..... | 13 |
| 3.3. Debit Lindi | 15 |
| 3.3.1. Perhitungan waktu tinggal..... | 15 |
| 3.3.2. Perhitungan <i>Hydraulic Loading Rate</i> dan <i>BOD Loading Rate</i> | 16 |
| 3.3.3. Perhitungan debit efluen lindi | 16 |
| 3.4. Tanaman Pandan Wangi (<i>Pandanus amaryllifolus</i>) | 17 |

| | |
|--|-----------|
| 3.5. Media Tumbuh (Substrat) | 18 |
| 3.6. Sabut Kelapa dan Serbuk Kayu | 18 |
| BAB IV METODE PENELITIAN | 20 |
| 4.1. Waktu dan Lokasi Penelitian | 20 |
| 4.2. Konsep Desain | 20 |
| 4.3. Alat dan Bahan Penelitian..... | 22 |
| 4.4. Tahapan Penelitian..... | 22 |
| 4.5. Bagan Alir Penelitian | 23 |
| 4.6. Pengujian Kualitas Lindi..... | 23 |
| 4.6.1. Metode analisis pH..... | 24 |
| 4.6.2. Metode analisis kadar <i>Biological Oxygen Demand</i> (BOD) | 24 |
| 4.6.3. Metode analisis kadar <i>Chemical Oxygen Demand</i> (COD) | 25 |
| 4.6.4. Metode analisis kadar <i>Total Suspended Solid</i> (TSS) | 25 |
| 4.6.5. Metode analisis kekeruhan..... | 26 |
| 4.6.6. Metode analisis kadar nitrat | 26 |
| 4.6.7. Metode analisis kadar fosfat..... | 27 |
| 4.7. Analisis Data..... | 27 |
| 4.8. Alur Kegiatan..... | 28 |
| BAB V HASIL DAN PEMBAHASAN..... | 30 |
| 5.1. Gambaran Umum TPA Galuga..... | 30 |
| 5.2. Pengolahan Lindi TPA Galuga Eksisting | 34 |
| 5.2.1. Pipa penyalur lindi | 34 |
| 5.2.2. Kolam lindi | 35 |
| 5.2.3. Instalasi Pengolahan Lindi (IPL) | 36 |
| 5.3. Penetapan Unit dan Perhitungan Dimensi <i>Constructed Wetland</i> | 38 |
| 5.4. Proses Pengolahan | 40 |
| 5.5. Evaluasi Desain <i>Constructed Wetland</i> | 40 |
| 5.5.1. Pengukuran debit dan waktu tinggal <i>constructed wetland</i> | 40 |
| 5.5.2. Perhitungan <i>Hydraulic Loading Rate</i> dan <i>BOD Loading Rate</i> | 42 |
| 5.6. Hasil Pengujian | 43 |
| 5.6.1. <i>Constructed wetland</i> tanpa tanaman | 43 |
| 5.6.2. <i>Constructed wetland</i> dengan tanaman | 45 |
| 5.6.3. Kondisi fisik tanaman pandan..... | 48 |

| | | |
|-----------------------------------|--|----|
| 5.7. | Analisis Parameter | 49 |
| 5.7.1. | pH..... | 49 |
| 5.7.2. | <i>Biological Oxygen Demand</i> (BOD) | 50 |
| 5.7.3. | <i>Chemical Oxygen Demand</i> (COD) | 51 |
| 5.7.4. | <i>Total Suspended Solid</i> (TSS) | 53 |
| 5.7.5. | Kekeruhan | 54 |
| 5.7.6. | Nitrat | 56 |
| 5.7.7. | Fosfat..... | 57 |
| 5.7.8. | Efisiensi penurunan konsentrasi dari parameter pencemar..... | 59 |
| 5.8. | Keseimbangan Massa (<i>Mass Balance</i>) | 60 |
| 5.9. | Kemampuan Tanaman Dalam Penurunan Polutan | 61 |
| 5.10. | Hubungan Waktu Detensi terhadap Penurunan Polutan..... | 62 |
| BAB VI KESIMPULAN DAN SARAN | | 64 |
| 6.1. | Kesimpulan | 64 |
| 6.2. | Saran | 65 |
| DAFTAR PUSTAKA | | 67 |
| LAMPIRAN..... | | 71 |
