Test 20

Test 22

## Test 21

## Appendix B

Addressing points from the marking criteria based on the canvas file.

This section is supposed to address points on that file that is not included in the report

Quality of report : check this report

Quality of product : check the files, see also readme

Quality of process : see documentations

Quality of demonstration : see slides , will be included in the final repository

Quality of management : see project planning above, also check gitlab and teams.

Only a single meeting with supervisor was missed in this project, and that was with permission

Substantialness of Achievement : See this report, all ideas here that is not cited is original and made by me

## Appendix C

Countin the number of words since for some reason google docs and Microsoft words have different counts.

WordCloud
