

TABLE OF CONTENT

ABSTRACT	3
TABLE OF CONTENT	6
CHAPTER I INTRODUCTION	8
1.1 Background	9
1.2 Research Questions & Significance	10
CHAPTER II LITERATURE REVIEW	12
2.1 Artificial intelligence	12
2.2 Cyber Security	12
2.3 Cyber Crime	13
2.4 The Public Sector	14
2.5 AI and Cybersecurity in Public Sector	14
2.6 Related Work	15
CHAPTER III METHODOLOGY	18
3.1 Research Strategy	18
3.2 Method of Analysis	19
CHAPTER IV RESULTS	21
4.1 The Current State of Cybersecurity in the Public Sector	21
4.2 The Reason Why Public Sectors are Susceptible to Cyber-attacks	23
4.3 What are Governments Doing to Fight Cybercrime? (Mandiant, 2017)	24
4.4 How can Artificial Intelligence Boost Cybersecurity of Public Sector?	25
4.5 The Impact of Artificial Intelligence on Cybersecurity of Public Sector	26
4.5.1 Aid the Cybersecurity Skills Shortage	27
4.5.2 IT Asset Inventory	29
4.5.3 Detection of Threat Exposure	30
4.5.4 Controlling Effectiveness	30
4.5.5 Breach Risk Prediction	30
4.5.6 Incident Response	30
4.6 Challenges	31
4.7 Other Aspects to Consider	32

CHAPTER V CONCLUSIONS	34
5.1 Conclusions	34
5.3 Limitation and Suggestion for Future Research	36
Bibliography	37
