

Bachelor's Thesis for IB

Foreign Direct Investment and Human Development in Indonesia

This thesis is created as a part of the Bachelor's Thesis IB course to analyze the impact of foreign direct investment inflows on human development in regions of Indonesia. The research will be conducted using fixed effects panel-data regression using data from 34 provinces in Indonesia.

Keywords: human development, human development index (HDI), foreign direct investment (FDI), provinces of Indonesia, FDI spillovers
