**Abstract**

This research aims to know and analyze the implementation of legal protection carried out by the OJK against illegal investments that are troubling the public as well as to know and analyze the legal protection of investors related to the money game case by PT Future View Tech or Vtube.

The type of research used is empirical normative conducted through literature studies by analyzing primary, secondary, and tertiary legal materials relevant to this study as well as through field studies by conducting questionnaire research on respondents who understand the problems in this study. The results of the research obtained from literature and field studies will be analyzed qualitatively to answer the subject matter.

From the result of research, it was concluded that the legal protection of investors for Vtube members could not be realized because Vtube did not meet the legal requirements as a business entity in the form of a limited liability company based on Law Number 40 of 2007 concerning Limited Liability Companies. Vtube members cannot be classified as investors based on Law Number 25 of 2007 concerning Investment. The role of OJK in eradicating illegal investment with the help of SWI is running according to the planned program. The prevalence of illegal investment cases in the community is caused by the lack of financial literacy and the less than optimal approach by OJK and SWI to the community.
