Abstract 11
1 INTRODUCTION 12
1.1 Background 12
Matrix acidizing in hydraulic fractured wells success ratio in South Sumatra 14
1.2 Scope and problem statements 16
1.3 Research Novelty 16
1.4 Objectives of the study 16
1.5 Significance 17
2 LITERATURE REVIEW 18
2.1 Literature review 18
2.1.1 Matrix acidizing 18
2.1.2 Sandstone acidizing recommended guideline 19
2.1.3 Sandstone acidizing design calculation 22
2.1.4 Hydraulic fracturing 24
2.1.5 Multivariate data analysis 25
2.1.6 Qualitative prediction using supervised machine learning 26
2.1.7 Quantitative prediction using multiple regression 29
2.1.8 Machine learning assisted publication in matrix acidizing 31
2.2 Basic theory 32
2.2.1 Implementation of machine learning and multiple regression 32
2.2.2 Qualitative prediction using machine learning 33
2.2.3 Quantitative prediction using multiple regression 33
2.2.4 The new perspective in this study 33
2.3 Hypothesis 33
3 RESEARCH METHODOLOGY 35
3.1 Data mining 35
3.2 Supervised machine learning simulation 36
3.3 Principal component regression using SPSS 37
3.4 Partial least square regression 38
3.5 Combining supervised machine learning and multiple regression 38
4 RESULTS AND DISCUSSION 40
4.1 Qualitative Successfulness prediction using supervised machine learning 41

4.2 Quantitative prediction using principal component regression (PCR) using SPSS 42
4.3 Quantitative prediction using partial least square regression (PLS-R) 47
4.4 Combination of qualitative and quantitative prediction approach 50
4.5 Test validation using new data 50
5 CONCLUSIONS AND RECOMMENDATIONS 52
BIBLIOGRAPHY 53
Appendix A: Qualitative prediction using supervised machine learning 56
Appendix B: Quantitative prediction PLS-R Minitab report 60
