FOREWORDS

Praise and gratitude of the author go to Allah the Almighty, without his permission, the author possibly could not have finished this undergraduate thesis. On this occasion, author would also like to express his gratitude to the following individuals:

1. Sigit Priyanta, S.Si., M.Kom., Dr., as the author's thesis supervisor, who provided guidance and knowledge throughout the process of writing this undergraduate thesis.
2. Dr. -Ing. Mhd. Reza M. I. Pulungan, S. Si., M. Sc., as the author's academic supervisor, who has offered guidance and support during the four years the author studied at UGM.
3. The author's parents, who have supported him throughout his life up until now.
4. Nabila Chavia Aurellita, who has been the author's biggest support system during the writing of this thesis.
5. The academic staff of the Department of Computer Science and Electronics, Faculty of Mathematics and Natural Sciences, Gadjah Mada University.
6. Others whom the author cannot mention individually, but who have taken part in supporting the writing of this thesis.

The author hopes that this undergraduate thesis could be helpful and inspiring to others, especially those who are pursuing this field of study.
