

## TABLE OF CONTENTS

<b>APPROVAL SHEET .....</b>	<b>i</b>
<b>DECLARATION OF AUTHENTICITY .....</b>	<b>ii</b>
<b>ACKNOWLEDGMENT .....</b>	<b>iii</b>
<b>INTISARI .....</b>	<b>xi</b>
<b>ABSTRACT .....</b>	<b>xii</b>
<b>CHAPTER I .....</b>	<b>1</b>
1.1. Background .....	1
1.2. Objectives .....	3
1.3. Expected outcome .....	4
<b>CHAPTER II .....</b>	<b>5</b>
2.1. Mycoprotein .....	5
2.2. Mycoprotein production .....	8
2.2.1. Filamentous fungi strain .....	10
2.2.2. Carbon source .....	11
2.2.3. Type of fermentation system .....	13
2.2.4. Inoculum concentration .....	14
2.2.5. Agitation speed .....	15
2.3. Cassava peel .....	16
2.4. Acid hydrolysis of cassava peel .....	20
<b>CHAPTER III .....</b>	<b>24</b>
3.1. Time and location of the research .....	24
3.2. Materials and instruments .....	24
3.2.1. <i>Rhizopus oligosporus</i> strain preparation .....	24
3.2.2. Cassava peel preparation .....	24
3.2.3. Acid hydrolysis of cassava peel .....	25
3.2.4. Total reducing sugar analysis .....	25
3.2.5. <i>Rhizopus oligosporus</i> cultivation in cassava peel media .....	25
3.2.6. <i>Rhizopus oligosporus</i> harvesting from cassava peel media .....	26
3.2.7. Mycoprotein content analysis .....	26
3.2.8. Chemical oxygen demand analysis .....	26
3.3. Method .....	27
3.3.1. <i>Rhizopus oligosporus</i> strain preparation .....	27
3.3.2. Cassava peel preparation .....	27
3.3.3. Acid hydrolysis of cassava peel .....	28
3.3.4. <i>Rhizopus oligosporus</i> cultivation in cassava peel media .....	28
3.3.5. <i>Rhizopus oligosporus</i> harvesting from cassava peel media .....	29
3.4. Experimental design and data analysis .....	29
3.4.1. Total reducing sugar analysis .....	29
3.4.2. Mycoprotein content analysis .....	31
3.4.3. Chemical Oxygen Demand (COD) analysis .....	31
3.4.4. Experimental design .....	33
<b>CHAPTER IV .....</b>	<b>34</b>
4.1. Effect of acid hydrolysis of cassava peel on the reducing sugar content	

4.2. Effect of different inoculum concentration on mycoprotein biomass production and protein content using <i>Rhizopus oligosporus</i> filamentous fungi strain and cassava peel substrate .....	35
4.3. Effect of different agitation speed on mycoprotein biomass production and protein content using <i>Rhizopus oligosporus</i> filamentous fungi strain and cassava peel substrate .....	39
4.4. Characteristic of Chemical Oxygen Demand (COD) and reducing sugar levels in cassava peel media during the optimal condition of <i>Rhizopus oligosporus</i> mycoprotein production .....	42
CHAPTER V .....	48
5.1. Conclusion .....	48
5.2. Recommendation .....	48
REFERENCES .....	49
APPENDIX .....	57

## LIST OF TABLES

<b>Table 2. 1.</b> Protein content in plant-based food (g/ 100 g) (McCance and Widdowson's, 2015) .....	5
<b>Table 2. 2.</b> Protein content in animal-based food (g/ 100 g) (McCance and Widdowson's, 2015) .....	6
<b>Table 2. 3.</b> Mycoprotein amino acid profile and protein quality (Gilani and Lee, 2003) .....	8
<b>Table 2. 4.</b> Characteristics of mycoproteins produced using variant substrates from food industry waste and several type of filamentous fungi.....	9
<b>Table 2. 5.</b> Proximate composition of cassava peel (Olaleru and Adepegba, 2015) .....	19

## LIST OF FIGURES

<b>Figure 4. 1.</b> Comparison of reducing sugar levels in cassava peel before and after acid hydrolysis .....	34
<b>Figure 4. 2.</b> Effect of inoculum concentration on <i>Rhizopus oligosporus</i> biomass production .....	36
<b>Figure 4. 3.</b> Effect of inoculum concentration on <i>Rhizopus oligosporus</i> protein content .....	38
<b>Figure 4. 4.</b> Effect of agitation speed on <i>Rhizopus oligosporus</i> biomass production .....	40
<b>Figure 4. 5.</b> Effect of agitation speed on <i>Rhizopus oligosporus</i> protein content .	41
<b>Figure 4. 6.</b> Reducing sugar during fermentation on the optimum condition of (a) agitation speed (150 rpm) for protein content (b) inoculum concentration ( $3 \times 10^6$ spore/mL) for biomass production and protein content (c) agitation speed (200 rpm) for biomass production.....	43
<b>Figure 4. 7.</b> COD value (mg O <sub>2</sub> /L) on cassava peel media before and after fermentation on optimum growth conditions .....	46

## LIST OF APPENDIXES

<b>Appendix 1.</b> Glucose standard curve .....	57
<b>Appendix 2.</b> Reducing sugar content in cassava peel before and after acid hydrolysis .....	57
<b>Appendix 3.</b> Effect of inoculum concentration on <i>Rhizopus oligosporus</i> biomass production .....	58
<b>Appendix 4.</b> One-Way ANOVA analysis on the effect of inoculum concentration on <i>Rhizopus oligosporus</i> biomass production .....	58
<b>Appendix 5.</b> Post Hoc-LSD analysis using IBM SPSS statistic on the effect of inoculum concentration on <i>Rhizopus oligosporus</i> biomass production.....	59
<b>Appendix 6.</b> Effect of inoculum concentration on <i>Rhizopus oligosporus</i> protein content .....	59
<b>Appendix 7.</b> One-Way ANOVA analysis on the effect of inoculum concentration on <i>Rhizopus oligosporus</i> protein content .....	60
<b>Appendix 8.</b> Post Hoc-LSD analysis using IBM SPSS statistic on the effect of inoculum concentration on <i>Rhizopus oligosporus</i> protein content .....	60
<b>Appendix 9.</b> Effect of agitation speed on <i>Rhizopus oligosporus</i> biomass production .....	61
<b>Appendix 10.</b> One-Way ANOVA analysis on the effect of agitation speed on <i>Rhizopus oligosporus</i> biomass production.....	61
<b>Appendix 11.</b> Post Hoc-LSD analysis using IBM SPSS statistic on the effect of agitation speed on <i>Rhizopus oligosporus</i> biomass production .....	62
<b>Appendix 12.</b> Effect of agitation speed on <i>Rhizopus oligosporus</i> protein content .....	62
<b>Appendix 13.</b> One-Way ANOVA analysis on the effect of inoculum concentration on <i>Rhizopus oligosporus</i> protein content .....	63
<b>Appendix 14.</b> Post Hoc-LSD analysis using IBM SPSS statistic on the effect of agitation speed on <i>Rhizopus oligosporus</i> protein content.....	63
<b>Appendix 15.</b> Reducing sugar analysis during fermentation on the optimum condition of agitation speed (150 rpm) for protein content .....	64
<b>Appendix 16.</b> Reducing sugar analysis during fermentation on the optimum condition of inoculum concentration ( $3 \times 10^6$ spore/mL) for biomass production and protein content.....	65
<b>Appendix 17.</b> Reducing sugar analysis during fermentation on the optimum condition of agitation speed (200 rpm) for biomass production .....	66
<b>Appendix 18.</b> COD value analysis on cassava peel media before and after fermentation for the optimum growth condition sample.....	67
<b>Appendix 19.</b> Chemical Oxygen Demand calibration curve.....	67
<b>Appendix 20.</b> Chemical Oxygen Demand analysis on dried cassava peel sample .....	68
<b>Appendix 21.</b> Documentation of dried cassava peel .....	68
<b>Appendix 22.</b> Documentation of cassava peel media before and after hydrolysis .....	68
<b>Appendix 23.</b> Documentation of total reducing sugar analysis (Nelson-Somogyi) .....	69

<b>Appendix 24.</b> Documentation of <i>Rhizopus oligosporus</i> biomass harvesting process .....	69
<b>Appendix 25.</b> Documentation of <i>Rhizopus oligosporus</i> biomass .....	69
<b>Appendix 26.</b> Documentation on protein content analysis .....	70
<b>Appendix 27.</b> Documentation on Chemical Oxygen Demand (COD) analysis...	70
<b>Appendix 28.</b> Documentation of potassium hydrogen phthalate standard for Chemical Oxygen Demand (COD) calibration curve .....	70
