ABSTRACT

One of the efforts made by the central government in the context of accelerating national economic development at the regional level is by granting regional autonomy authority, including at the lowest level, namely the village. The village has a Village Expenditure Revenue Budget which is used to finance the implementation of village government and community empowerment. This study aims to determine the effect of Village Funds, Village Fund Allocations, and Village Original Income on the Developing Village Index in 87 sub-districts in Kulon Progo Regency. The hypothesis in this study was tested using panel data regression. The results of this study indicate that there is influence from Village Funds, Village Fund Allocations on the Village Development Index for sub-districts in Kulon Progo Regency simultaneously. Meanwhile, village original income has no significant effect on the developing village index. When viewed partially, Village Funds and Village Fund Allocations have a significant positive effect on the Developing Village Index in Kulon Progo Regency. Meanwhile, Village Original Income has no significant effect in a negative direction on the Developing Village Index in Kulon Progo Regency.
