Cover	i
Approval Letter	ii
Signed Statement.....	iii
Acknowledgement.....	iv
TABLE OF CONTENTS	v
LIST OF TABLES	viii
LIST OF FIGURES	ix
LIST OF APPENDICES	x
ABSTRACT.....	xi
CHAPTER I INTRODUCTION	12
A. Background	12
B. Problem Statement	18
C. Research Benefits.....	20
D. Research Authenticity	22
CHAPTER II LITERATURE REVIEW.....	27
A. Literature Review	27
1. Cancer	27
2. Chemotherapy.....	31
3. Comfort	34
4. Self-efficacy for symptom management in Adult Cancer	48
5. Virtual Reality (VR)	57
B. Theoretical Foundation	74
C. Theoretical Framework	76
D. Study Framework	77
E. Study Hypothesis	78
CHAPTER III METHODOLOGY	79
A. Study Design	79
B. Place and Time of Study	80

C. Population and Study Sample	81
D. Sampling method	83
E. Concealment and Randomisation.....	83
F. Procedures	84
G. Study Variable.....	87
H. Operational Definition	88
I. Measurement Tool	91
J. Study Course	99
1. Preparation	99
2. Implementation.....	101
3. Reporting.....	104
K. Data Analysis	104
1. Univariate analysis.....	104
2. Bivariate analysis	105
3. Multivariate analysis.....	107
4. Effect Size	108
L. Ethical Principles	108
1. Informed consent.....	108
2. Anonymity (No name).....	109
3. Confidentiality.....	109
4. Beneficence.....	109
M. Barriers and Limitation	110
CHAPTER IV. RESULTS AND DISCUSSION.....	112
1. Feasibility and preliminary efficacy of the Smartphone based Virtual Reality Relaxation (S-VR)	112
1.1. Flow of recruitment process and baseline characteristics in pilot study.....	112
1.2. Patient demographic and clinical characteristics in pilot study	114
1.3. Preliminary effect of Intervention in pilot study.....	116
1.4. Evaluation of acceptability and interview responses from SVR group	118

2. A Randomized controlled trial of the effect of Smartphone-Based Virtual Reality Relaxation (S-VR)	120
2.1. Flow diagram and baseline characteristics in RCT study	120
2.2. Comparison of primary outcomes before and after intervention periods within groups in RCT study	124
2.3. Comparison of primary outcomes after intervention between two groups in RCT study.....	125
2.4. Adjusting of SGCQ score and SESM score after intervention by using linear regression.....	127
2.5. Changes in anxiety, pain, SBP, DBP and pulse rate over the time point of measurements (from baseline to T4) and indication of significant differences from pairwise comparisons	129
2.6. Percentage frequency of occurrence of each symptom for each item of the Virtual Reality Symptom Questionnaire (VRSQ)	134
B. Discussion	135
1. Feasibility and preliminary efficacy of the Smartphone based Virtual Reality Relaxation (S-VR).....	135
2. The Effect of Smartphone-Based Virtual Reality Relaxation (S-VR) in cancer patient undergoing chemotherapy	136
2.1. Socio-demographic and clinical characteristics in RCT study	137
2.2. Primary outcomes: comfort and self-efficacy	138
2.3. Secondary outcomes: Changes in anxiety, pain, SBP, DBP and pulse rate.....	141
2.4. Strength and limitation	145
CHAPTER V CONCLUSION AND RECOMMENDATION.....	147
A. Conclusion	147
B. Nursing implication.....	147
C. Recommendation.....	148
REFERENCES.....	152
APPENDICES	171
