

**KEBERDAYAAN PETANI MELALUI PENYULUHAN PARTISIPATIF POLA FMA  
(*FARMERS MANAGED EXTENSION ACTIVITIES*) DI KECAMATAN PANDAK  
KABUPATEN BANTUL**

Penelitian yang dilakukan di Kecamatan Pandak ini bertujuan untuk mengetahui tingkat keberdayaan petani melalui penyuluhan partisipatif pola FMA (*Farmers Managed Extension Activities*), serta untuk mengetahui faktor-faktor yang berpengaruh dalam keberdayaan petani. Metode dasar yang digunakan dalam penelitian ini adalah metode analisis deskriptif. Dalam pengambilan sampel desa digunakan metode purposive sampling, dan pengambilan sampel petani digunakan metode simple random sampling (60 petani). Data dianalisis dengan uji proporsi dan regresi linear berganda.

Keberdayaan petani dalam penelitian ini diukur dari tiga aspek keberdayaan : 1) Ekonomi, 2) Sosial, dan 3) Ekologi. Hasil penelitian menunjukkan sebagian besar petani memiliki keberdayaan yang tinggi hanya dalam aspek ekologi saja. Faktor luas lahan dan peran penyuluh berpengaruh signifikan positif terhadap keberdayaan petani melalui penyuluhan partisipatif pola FMA.

***THE POWER OF FARMERS THROUGH PARTICIPATORY EXTENSION BY FMA  
(FARMERS MANAGED EXTENSION ACTIVITIES) PATTERN IN PANDAK  
SUBDISTRICT OF BANTUL REGENCY***

*The research that was located in Pandak Subdistrict had aimed to know how far the level of power of farmers through participatory extension by FMA pattern and its influenced factors. The basic method used in the research was descriptive analytic. The village samples were decided by purposive sampling and farmer samples were decided by simple random sampling (60 farmers). The data was analysed by proportion and multiple regression analysis*

*The farmer's power in this research was measured by three aspects : 1) Economic, 2) Social, and 3) Ecology. The results showed that most of farmers have high power only in ecological aspect. The factors of size of land and agricultural extension worker's role positively influenced the level of farmer's power.*
