### Abstrak

Tingkat *cyberbullying* pada di Indonesia cukup tinggi, terutama di kalangan usia dewasa awal. Salah satu penyebab individu dewasa awal melakukan perilaku *cyberbullying* adalah pengaruh dari *childhood maltreatment* pada masa lalu. Penelitian ini bertujuan untuk mengetahui peran *childhood maltreatment* terhadap perilaku *cyberbullying* pada masa dewasa awal. Partisipan penelitian terdiri dari 261 individu dewasa awal Indonesia berusia 18-24 tahun. Data dikumpulkan menggunakan 2 kuesioner yaitu Skala *Cyberbullying* dan *Childhood Trauma Questionnaire - Short Form (CTQ-SF)*. Pengambilan data dilakukan secara daring. Berdasarkan hasil analisis regresi linear sederhana ditemukan bahwa perilaku *cyberbullying* dipengaruhi oleh *childhood maltreatment* sebesar 14,8%.

**Kata Kunci:** *cyberbullying, childhood maltreatment, dewasa awal*

### Abstract

*Cyberbullying* perpetration is quite high in Indonesia, specially in early adulthood. One of the cause of *cyberbullying* perpetration among early adulthood is *childhood maltreatment* in the past. This study aims to determine the role of *childhood maltreatment* on *cyberbullying* perpetration in early adulthood. Participants consist of 261 Indonesian early adulthood individuals with the age of 18-24 years old. The data is collected online by using *cyberbullying* questionnaire and *Childhood Trauma Questionnaire - Short Form (CTQ-SF)*. Based on the results of simple linear regression analysis, it was found that *cyberbullying* perpetraion was affected by *childhood maltreatment* by 14.8%.

**Keywords:** *cyberbullying, childhood maltreatment, early adulthood*
