

INTISARI

EFEKTIFITAS PENYELENGGARAAN TUGAS POKOK TNI AL DALAM MEWUJUDKAN KETAHANAN NASIONAL BIDANG HANKAM MATRA LAUT (STUDI EVALUASI KINERJA KOARMATIM DALAM 2 TAHUN)

Dosen Pembimbing Utama : Noegroho Amien Soetiarso, S.H., M.Si.

Dosen Pembimbing Pendamping : Drs. Dafri Agussalim, M.A.

Keterbatasan sumber daya Alut Sista dan anggaran merupakan kendala utama TNI AL dalam penyelenggaraan tugas pokok mengendalikan wilayah laut yang sangat luas, dengan berbagai permasalahan kompleks di dalamnya. Dengan mengevaluasi kinerja Koarmatim dalam penyelenggaraan tugas pokok TNI AL, diharapkan menemukan berbagai peluang dan kelemahan yang dapat dijadikan masukan dan dasar pertimbangan para perencana dan penentu strategi kebijakan TNI AL dalam membangun postur kekuatan dan kemampuan agar penyelenggaraan tugas pokok lebih efektif dan optimal.

Kinerja TNI AL dalam penyelenggaraan tugas pokok dirumuskan sebagai aspek operasional pembinaan serta penggunaan kemampuan dan kekuatan, yaitu interaksi aspek fungsi operasional dan aspek sumber daya. Dengan menentukan unsur-unsur indikator penilaian yang diperoleh berdasarkan data-data dari responden sesuai kualifikasi yang dipersyaratkan, selanjutnya dianalisis dengan menerapkan metoda Delphi sehingga dapat disajikan dalam skala kualitatif yang menyatakan efektifitas kinerja Koarmatim dalam mendukung penyelenggaraan tugas pokok TNI AL.

Berdasarkan hasil analisis terhadap unsur-unsur indikator dari aspek fungsi operasional dan aspek sumber daya yang merupakan aspek operasional dari pembinaan serta penggunaan kemampuan dan kekuatan TNI AL sesuai data-data yang dikumpulkan dari hasil penelitian, maka kinerja Koarmatim dalam mendukung penyelenggaraan tugas pokok TNI AL dinyatakan cukup efektif.

Kata Kunci : *Tugas Pokok, Kemampuan dan Kekuatan, Kinerja*

ABSTRACT

THE EFFECTIVENESS OF THE INDONESIA NAVY MAIN TASK IMPLEMENTATION TO REALIZE THE NATIONAL RESILIENCE OF DEFENCE AND SECURITY SECTOR IN SEA ASPECT (THE EVALUATION STUDY OF THE KOARMATIM EFFORT FOR TWO YEARS)

The First Guide Lecturer : Noegroho Amien Soetiarto, S.H., M.Si.

The Second Guide Lecturer : Drs. Dafri Agussalim, M.A.

The limitation of the weapon system main equipment and fund resources are the major crisis of the Indonesia Navy in the main task implementation to control the very large sea area within many complex problems. By evaluating the Koarmatim effort in support the Indonesia Navy main task implementation, it should expect to get the various opportunities and weaknesses that its become the input and the base of consideration for the strategy policy planners and makers to construct the capability and the force structure of the Indonesia Navy, in order to the main task implementation more effective and optimal.

The effort of Indonesia Navy in the main task implementation is formulated as the operational aspect of the build up and the use of the capability and force, that is the interaction of operational function and resources aspect. By determining the elements of evaluation indicator base on the data which get from the qualify respondents, then its analyzed with Delphi methods, so that its could be displayed in qualitative scale that declare the effectiveness of the Koarmatim effort in support the main task implementation of Indonesia Navy.

Base on the result of the analysis method toward the indicator elements of the operational function and resource aspects, that is the operational aspects of the build up and the use of the Indonesia Navy capability and force, therefore the Koarmatim effort in support of the Indonesia Navy main task implementation can declare in effective sufficient level.
