Acknowledgements

This thesis would not have been completed without the support and guidance of several individuals that have directly or indirectly contributed to the completion of this thesis. Firstly, I would like to thank God almighty for giving me physical wellbeing throughout the writing process. Secondly, I would like to thank Mas Rizky Alif Alfian as my thesis supervisor, who has provided substantial feedback that has greatly improved the content of the thesis, and has allocated the time to improve my thesis.

Thirdly, I would like to acknowledge the great support my family has given me. To Mami, Rafael, Eyang, Biring, Bibik, Om Wawan, and others that I cannot state one by one, thank you for always believing in me, and giving encouragement during moments of doubt. I cannot ask for a better support system. To my mother; I am very grateful for giving me the opportunity to study at one of the country's best universities. Whatever good comes after this thesis is the fruit of your unconditional support and love that you have given me from the day I took my first steps. And to Davina, I thank you for always being by my side. These past few months have been one of, if not the toughest periods in my life. Without your support, I might not be able to see this period through. Your presence has helped me see the light at the end of the tunnel.

Lastly, I am dedicating this thesis to my father, who has recently passed away. Despite not being able to see me complete my thesis, I am certain that he has bestowed upon me all of his strength and wisdom. Without the unwavering love, care, and support he has given me throughout my lifetime, I would not possess the fortitude to complete this thesis. I am very grateful to be your son. I hope this achievement of mine could give a smile on your face, wherever you are watching me from. 21 years of knowing you is way too short, but your kindness did it justice. We have an eternity to look forward to. Hope we can meet again soon, and rest well.
