

INTISARI

Sektor pertanian merupakan salah satu sektor yang penting dalam perekonomian. Hal ini karena sektor pertanian merupakan salah satu kontributor Produk Domestik Bruto (PDB) terbesar di Indonesia, serta berperan sebagai penyedia pangan masyarakat. Namun, laju pertumbuhan sektor pertanian cenderung lambat jika dibandingkan dengan sektor ekonomi lainnya. Penelitian ini bertujuan untuk mengetahui (1) kontribusi sektor dan subsektor pertanian terhadap PDRB total, (2) *trend* pertumbuhan PDRB sektor pertanian dan PDRB total, dan (3) faktor yang memengaruhi PDRB sektor pertanian Provinsi Jawa Barat. Penelitian dilakukan di Provinsi Jawa Barat, karena merupakan salah satu Provinsi dengan PDRB sektor pertanian dan penghasil padi terbesar di Indonesia. Analisis dilakukan dengan analisis kontribusi, *trend*, dan regresi linier berganda pada periode 2010 hingga 2022. Hasil penelitian menunjukkan bahwa kontribusi sektor dan subsektor pertanian mengalami penurunan, *trend* pertumbuhan PDRB total mengalami penurunan, *trend* pertumbuhan PDRB sektor pertanian mengalami peningkatan, serta faktor yang berpengaruh secara positif dan signifikan terhadap PDRB sektor pertanian adalah PMDN dan ekspor.

Kata kunci: kontribusi, *trend*, faktor, sektor pertanian, Produk Domestik Regional Bruto (PDRB).

ABSTRACT

Agricultural sector is one of the important sectors in the economy. This is because the agricultural sector is one of the largest contributors to Gross Domestic Product (GDP) in Indonesia, and plays a role as a provider of food for the community. However, the growth rate of the agricultural sector tends to be slow when compared to other economic sectors. This research aims to determine (1) the contribution of the agricultural sector and subsector to total GRDP, (2) the growth trend of GRDP in the agricultural sector and total GRDP, and (3) factors that influence GRDP in the agricultural sector of West Java Province. The research was conducted in West Java Province, because it is one of the provinces with the largest GRDP in the agricultural sector and rice producer in Indonesia. The analysis was carried out using contribution, trend and multiple linear regression analysis in the period 2010 to 2022. The research results showed that the contribution of the agricultural sector and subsector had decreased, the total GDP growth trend had decreased, the agricultural sector GDP growth trend had increased, and factors that had a positive and significant impact on GRDP in the agricultural sector are PMDN and exports.

Keywords: *contribution, trend, factors, agricultural sector, Gross Regional Domestic Product (GRDP).*
