Abstract

### Chapter 1 Introduction

A. Background .....	1
B. Research Purposes .....	3
C. Research Significance .....	3
D. Problem Limitation .....	3
E. Originality .....	4

### Chapter 2 Literature Review

A. Shear-Friction .....	5
B. Dynamic Loading .....	11

### Chapter 3 Basic Theories

A. Precast Concrete .....	15
B. Shear and Shear Friction .....	16
C. One-Way Concrete Slab .....	27
D. Dynamic and Fatigue Loading .....	31
E. Shear Connector .....	35
F. Fatigue Properties of Component Materials .....	37
G. Reinforced Concrete Bridge Deck Durability .....	39

### Chapter 4 Research Method

A. Materials and Specimens .....	42
B. Shear Connectors .....	43
C. Loading Arrangement .....	45
D. Testing Procedure .....	47
E. Instrumentation .....	49

### Chapter 5 Test Results and Discussion

A. Materials .....	50
B. Basic Static Flexural Strength .....	52
C. Flexural Strength after Subjected to Nonreversal .....	57
D. Problem Encountered .....	69

### Chapter 6 Conclusions and Suggestion

A. Conclusions .....	70
B. Suggestion .....	71

## List of Figure

Fig. No.	Title	Page
<b>Figure 2.1</b>	<i>Shear Transfer test Specimen (Hwang et al 2000).</i>	7
<b>Figure 2.2</b>	<i>Test result diagram of interlayer bond deterioration under repeated shear load (Nasch, 1997).</i>	9
<b>Figure 2.3</b>	<i>Fatigue strength of plain concrete in tension, compression or flexure (Shah, 1997)</i>	12
<b>Figure 2.4</b>	<i>Net slab deflection under static load and pulsating load (Youn and Chang, 1998)</i>	14
<b>Figure 3.1</b>	<i>Beam and an element cut out from it by two adjoining section <math>\Delta x</math> apart (Popov, 1968)</i>	16
<b>Figure 3.2</b>	<i>The relation between the loading and the shear diagrams (Popov, 1968).</i>	19
<b>Figure 3.3</b>	<i>Sectioned body (Popov, 1968).</i>	20
<b>Figure 3.4</b>	<i>The most general state of stress acting on an element (Popov, 1968).</i>	21
<b>Figure 3.5</b>	<i>An element of a body in pure shear (Popov, 1968).</i>	23
<b>Figure 3.6</b>	<i>Inclined sections through element</i>	23
<b>Figure 3.7</b>	<i>Stress-strain diagram of one-way slab</i>	27
<b>Figure 3.8</b>	<i>Two points concentrated load for beam or one-way slab (Nawy, 1990).</i>	28
<b>Figure 3.9</b>	<i>Composite concrete slab behavior considering no interface shear-friction resistance</i>	29
<b>Figure 3.10</b>	<i>Shear force diagram developed by two-concentrated load.</i>	30
<b>Figure 3.11</b>	<i>Diagrams of periodic load (Suhendro, 2000)</i>	31
<b>Figure 3.12</b>	<i>Time versus forces diagram of impact load. (Krauthamer and Zinnedine, 2000)</i>	32
<b>Figure 3.13</b>	<i>Typical stress-time cycles of fatigue loading (Benham and Crawford, 1987)</i>	34
<b>Figure 4.1</b>	<i>Reinforcing and dimension of specimen</i>	43
<b>Figure 4.2</b>	<i>Shear connectors placement</i>	44
<b>Figure 4.3</b>	<i>Loading position</i>	45
<b>Figure 4.4</b>	<i>Typical diagram of nonreversal cyclic loading</i>	46
<b>Figure 4.5</b>	<i>Nonreversal cyclic loading setup</i>	46

Figure	Title	Page
<b>Figure 4.6</b>	<i>Typical of first crack vs. load cycle diagram</i>	48
<b>Figure 4.7</b>	<i>Typical of ultimate flexural strength vs. number of cycle</i>	49
<b>Figure 5.1</b>	<i>Stress-strain diagram of reinforcing bar</i>	51
<b>Figure 5.2</b>	<i>Headed bolt shear connector</i>	52
<b>Figure 5.3</b>	<i>Ultimate flexural strength</i>	53
<b>Figure 5.4</b>	<i>Load-deflection diagram of basic static test</i>	54
<b>Figure 5.5</b>	<i>Diagram of nonreversal cyclic loading</i>	56
<b>Figure 5.6</b>	<i>Nonreversal cyclic loading test setup</i>	56
<b>Figure 5.7</b>	<i>Load-Load cycles diagram at first crack</i>	59
<b>Figure 5.8</b>	<i>Degradation of first crack load due to cyclic load</i>	60
<b>Figure 5.9</b>	<i>Load-load cycles diagram at the maximum linear flexural strength</i>	62
<b>Figure 5.10</b>	<i>Degradation at the maximum linear flexural strength due to cyclic load</i>	63
<b>Figure 5.11</b>	<i>Mid span deflection vs. load cycles</i>	64
<b>Figure 5.12</b>	<i>Load deflection diagram of TSC specimens</i>	65
<b>Figure 5.13</b>	<i>Load deflection diagram of TSC specimens</i>	66
<b>Figure 5.14</b>	<i>The degradation of stiffness of TSC and DSC specimens</i>	67
<b>Figure 5.15</b>	<i>Load-deflection diagram of TSC specimens interconnection failure</i>	68
<b>Figure 5.16</b>	<i>Specimens after tested up to failure</i>	69
