STATEMENT SHEET	v
PREFACE	vii
TABLE OF CONTENTS	viii
LIST OF TABLES	xi
LIST OF FIGURES	xii
LIST OF APPENDIXES	xiv
<i>ABSTRACT</i>	xv
INTISARI	xvi
 CHAPTER 1 INTRODUCTION.....	 1
1.1 Background	1
1.2 Research Questions	2
1.3 Research Objectives	3
1.4 Limitations	3
1.5 Research Outcomes	3
1.6 Thesis's Structure	4
 CHAPTER 2 LITERATURE REVIEW.....	 6
2.1 Concepts of Liquefaction	6
2.2 Liquefaction Causing Factor	6
2.2.1 Earthquake Intensity	7
2.2.2 Epicenter Distance	7
2.3 Liquefaction triggering factors.....	7
2.3.1 Vibration Characteristic.....	7
2.3.2 Soil Type.....	7
2.3.3 Ground Water Table	7
2.3.4 Grainsize Distribution.....	8
2.3.5 Initial Relative Density	8
2.3.6 Drainage and Dimension Deposit.....	8
2.3.7 Soil Drainage Ability	8
2.4 Mitigation of Liquefaction	9
2.5 Research Authenticity	12
 CHAPTER 3 THEORETICAL FRAMEWORK	 16
3.1 Simplified Procedure.....	16
3.1.1 Cyclic Resistance Ratio.....	16
3.1.2 Cyclic Stress Ratio	19

3.2 Numerical Approach (Finite Element Method)	20
3.2.1 Simplification Concept of Geometries	21
3.2.2 Concept of Geostudio Module Quake/W	23
3.2.3 Concept of MIDAS GT NX	25
3.3 Soil Modeling Parameters	25
3.4 Liquefaction Potential Index	26
3.5 Active and Passive force of the soil during the earthquake	27
3.5.1 Rankine Theory	27
3.5.2 Mononobe-Okabe Pseudostatic Method	28
3.5.3 Type of Stability Failures	30
3.6 Post-Liquefaction Analysis	31
3.4.1 Settlement	32
3.4.2 Lateral Spreading	33
3.7 Liquefaction mitigation Plans	34
 CHAPTER 4 RESEARCH METHOD	 37
4.1 Research Location	37
4.2 Research Procedure	38
4.2.1 Literature Review	38
4.2.2 Data Collection	38
4.2.3 Empirical Approach	40
4.2.4 Numerical Approach	40
4.3 Liquefaction Numerical Modeling	43
4.3.1 Modeling Procedure	43
4.3.2 Midas Modeling Procedure	47
4.3.3 Comparison of Liquefaction Mechanism	49
4.3.4 Liquefaction Potential Map Creation	49
4.3.5 Structure Stability	49
4.3.6 Soil Structure Interaction	49
4.3.7 Determination of the mitigation plan	49
4.3.8 Application of Mitigation Plan	53
 CHAPTER 5 RESULT AND DISCUSSION	 56
5.1 Regional Geology Conditions	56
5.2 Ground Water Level Near the Site	56
5.3 Earthquake Historical	57
5.4 Liquefaction Potential Analysis	58
5.4.1 Empirical Approach	58
5.4.2 Results of Numerical Approaches	67
5.4.3 Liquefaction's Empirical and Numerical Comparison	69
5.5 Liquefaction Potential Index	71
5.6 Post Liquefaction Effects	72
5.6.1 Lateral Displacements	72

5.6.2 Settlements	73
5.7 Soil and Structures Interaction	75
5.7.1 Current ground soil condition	75
5.7.2 Upper structure force simulation.....	76
5.7.3 Structure Stability after the Earthquake	78
5.7.4 Comparison of Pseudostatic Sliding Failure to Numerical Model.....	82
5.8 Scoring calculation of Mitigation Plans	82
5.8.1 Weighting	83
5.8.2 Social Aspect Scoring Results.....	84
5.8.3 Environment Aspect Scoring Result	84
5.8.4 Economic Aspect Scoring Result.....	84
5.8.5 Constructability Scoring Results.....	84
5.8.6 Final scoring.....	87
5.8.7 The Chosen SMLTs	87
5.9 Applicability of Mitigation Plan	88
5.9.1 Design of soil mitigation	88
5.9.2 Results of Soil Parameter Trials.....	89
5.9.3 Deformation Before and After Mitigation Appliance	90
5.9.4 Factors of Safety Before and After Mitigation Appliance	93
5.9.5 Stone Column.....	94
5.9.6 Numerical Modeling of Stone Column Appliance.....	96
5.9.7 Mitigation Plan Suggestion	96
5.9.8 Cost Estimation of Mitigation Plans suggested.....	97
CHAPTER 6 CONCLUSION AND SUGGESTION	99
6.1 Conclusion	99
6.2 Suggestion	99
BIBLIOGRAPHY	101
APPENDIX	104
