

## *ABSTRACT*

Cultural heritage objects are remnants from specific community groups that hold significant value for the understanding and development of history, scientific knowledge, and culture. The preservation of cultural heritage is necessary to ensure that its existence is passed down to future generations. In the context of Cultural Heritage, preservation carries important meaning as an effort to manage cultural resources wisely, aiming to ensure their appropriate utilization and safeguarding the sustainability of these cultural assets. To achieve this goal, preservation activities must be carried out sustainably, with careful and systematic planning. In this regard, it is crucial to preserve and enhance the value and diversity of culture. By implementing continuous preservation efforts, the responsible community, as the rightful owners of Cultural Heritage, can experience the benefits derived from these preservation endeavors.

This research discusses preservation strategies for cultural heritage objects, focusing on the case of Frederik Jacob Rothenbühler's tomb and the Ahmad Yani Surabaya Golf Course. Preservation strategies need to be formulated based on research. The author conducted research through data collection via observation and literature review. Subsequently, an analysis was carried out using the method of analyzing opportunities and obstacles within the scope of preservation.
