TITLE	i
ENDORSEMENT	i
DECLARATION OF AUTHENTICITY	ii
ACKNOWLEDGEMENTS	iii
PREFACE	iv
TABLE OF CONTENTS	v
LIST OF FIGURES	vii
LIST OF TABLES	ix
ABSTRACT	x
INTISARI	xi
CHAPTER I	1
INTRODUCTION	1
1.1. Background	1
1.2. Objective	3
1.3. Benefit of research	3
CHAPTER II	4
STUDY LITERATURE	4
2.1. Phosphorous in soil	4
2.2. Arbuscular mycorrhizal fungi and their symbiosis with plant	6
2.3. Unavailable P acquisition mechanism by AMF	8
2.4. <i>Falcataria moluccana</i> as a host plant	11
2.5. Methods to study AMF-Plant symbiosis	12
CHAPTER III	14
METHODS	14
3.1. Time and Place	14
3.2. Tools and Materials	14
3.3. Experimental Design	18
3.4. Parameters Measured	19
3.5. Research Procedure	19
3.5.1. Sowing, inoculating, and transplanting process	19
3.5.2. Harvest and soil collection	20
3.5.3. Root staining, root length estimation, and colonization rate measurement ..	21
3.5.4. Acid phosphatase activity measurement	23
3.5.5. Organic acid measurement	24
3.5.6. Shoot P uptake and total P measurement in plant and soil	25
3.5.7. Available and unavailable P measurement in soil	27
3.6. Data analysis	28
CHAPTER IV	29

RESULTS AND DISCUSSION	29
4.1. Colonization rate	29
4.2. Effect of AMF inoculation on Acid phosphatase activity and organic acid production	31
4.2.1. Acid phosphatase activity	31
4.2.2. Organic acid production	35
4.3. Effect of AMF inoculation on soil P dynamics.....	38
4.4. Effect of AMF inoculation on shoot P dynamic	46
4.5. Effect of AMF inoculation on <i>Falcataria moluccana</i> growth	49
CHAPTER V	55
CONCLUSION AND SUGGESTION.....	55
5.1. Conclusion	55
5.2. Suggestion.....	55
References.....	57

LIST OF FIGURES

Figure 2.1. Acid phosphatase catalytic reaction.....	9
Figure 2.2. Diagrammatic representation of C-P exchange between the plant and the AM fungus (Duan et al., 2023).	11
Figure 3.1. 14-day-old <i>F. moluccana</i> seedling in a two-compartment pot culture.	14
Figure 3.2. Illustration of experimental design of two-compartment pot culture with air gap system (a) Hyphal compartment illustration (b) Hyphal compartment (c).	18
Figure 3.3. <i>Falcataria moluccana</i> seedlings at 14 days after sowing (DAS).	20
Figure 3.4. Stained root of <i>Falcataria moluccana</i> : root length measurement according to Newman (1996) (a) 100 root segment of <i>Falcataria moluccana</i> for colonization rate measurement (b).	22
Figure 3.5. ACP measurement processes and 96 Well Plate Flat-Bottom Sterilized with Lid.....	24
Figure 3.6. Organic acid (citric acid) test kit, Enzymatic BioAnalysis UV methods.	25
Figure 3.7. Digestion machine for shoot and soil (a), filtering processes after digest (b).	26
Figure 3.8. Available P measurement. Soil extract solution (a), Mixed colour development with soil extract solution (b).....	28
Figure 4.1. Colonization rate of inoculated (M1) or uninoculated (M0) <i>Rhizophagus clarus</i> in <i>Falcataria moluccana</i>	30
Figure 4.2. Acid phosphatase activity in the hyphal compartment (HC) soil of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT	32
Figure 4.3. Acid phosphatase activity in root & hyphal compartment (RHC) soil of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT	34
Figure 4.4. Organic acid (citric acid) concentration in the hyphal compartment (HC) of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT	37
Figure 4.5. Total P in the hyphal compartment of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT	39
Figure 4.6. Total P in root & hyphal compartment of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	40
Figure 4.7. Unavailable P in the hyphal compartment of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	42
Figure 4.8. Unavailable P in root & hyphal compartment of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	43

Figure 4.9. Available P in the hyphal compartment of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	45
Figure 4.10. Available P in root & hyphal compartment of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	46
Figure 4.11. Shoot P concentration of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	48
Figure 4.12. Shoot P uptake of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	49
Figure 4.13. Shoot dry weight of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	51
Figure 4.14. Root fresh weight of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	52
Figure 4.15. Root length of <i>Falcataria moluccana</i> uninoculated or inoculated with <i>Rhizophagus clarus</i> at 75 DAT.....	53

LIST OF TABLES

Table 1. Analysis of Variance (ANOVA) Results for Colonization Rate with Significance Level at 5%	30
Table 2. Analysis of Variance (ANOVA) Results for Acid Phosphatase Activity in HC and RHC with Significance Level at 5%	32
Table 3. Analysis of Variance (ANOVA) Results for Organic Acid in HC with Significance Level at 5%	38
Table 4. Analysis of Variance (ANOVA) Results for P Total in HC and RHC with Significance Level at 5%	39
Table 5. Analysis of Variance (ANOVA) Results for Unavailable P in HC and RHC with Significance Level at 5%	42
Table 6. Analysis of Variance (ANOVA) Results for Available P in HC and RHC with Significance Level at 5%	45
Table 7. Analysis of Variance (ANOVA) Results for Shoot P Concentration with Significance Level at 5%	48
Table 8. Analysis of Variance (ANOVA) Results for Shoot P Uptake with Significance Level at 5%	49
Table 9. Analysis of Variance (ANOVA) Results for Shoot Dry Weight with Significance Level at 5%	51
Table 10. Analysis of Variance (ANOVA) Results for Root Fresh Weight with Significance Level at 5%	53
Table 11. Analysis of Variance (ANOVA) Results for Root Length with Significance Level at 5%	54
