Modernisasi Perikanan Tangkap Melalui Bantuan Pemerintah Kepada Nelayan Pantai Samas Kabupaten Bantul

Penelitian ini dilakukan dengan tujuan untuk mendeskripsikan struktur sosial dan ekonomi nelayan di Pantai Samas, mengetahui bantuan pemerintah yang diterima nelayan di Pantai Samas, serta mengetahui kondisi sosial ekonomi nelayan sebelum dan sesudah menerima bantuan dari pemerintah. Pengumpulan data menggunakan metode *snowball sampling* dengan responden nelayan Pantai Samas yang terdiri dari 19 nelayan. Penelitian tersebut bersifat deskriptif kualitatif dengan teknik pengumpulan data dilakukan melalui kegiatan wawancara, observasi, dan dokumentasi. Data sekunder dikumpulkan melalui penelusuran dokumen di kelompok nelayan, Kantor Kalurahan Srigading, Kantor Kapanewon Sanden, Dinas Kelautan dan Perikanan Kabupaten Bantul dan DIY, dan Badan Pusat Statistik Kabupaten Bantul dan DIY. Hasil Penelitian menunjukkan bahwa mayoritas penduduk Pantai Samas yang berada pada usia produktif memiliki pekerjaan pokok sebagai nelayan. Modernisasi perikanan dilakukan melalui bantuan PUMP, pelatihan, dan sosialisasi. Bantuan yang diperoleh nelayan dinilai belum tepat sasaran sehingga hanya sebagian kecil dari nelayan merasakan manfaat bantuan tersebut.

Abstract

Modernization of Capture Fisheries Through Government Assistance to Samas Coastal Fishermen Bantul Regency

This research was conducted with the aim of describing the social and economic structure of fishermen in Samas Beach, knowing the government assistance received by fishermen in Samas Beach, and knowing the socio-economic conditions of fishermen before and after receiving assistance from the government. Data collection used snowball sampling method with 19 fishermen respondents from Samas Beach. The research is descriptive qualitative with data collection techniques conducted through interviews, observation, and documentation. Secondary data were collected through document searches in fishermen groups, Srigading Sub-district Office, Kapanewon Sanden Office, Marine and Fisheries Office of Bantul Regency and Yogyakarta, and Central Bureau of Statistics of Bantul Regency and Yogyakarta. The results show that the majority of Samas Beach residents who are at productive age have a main job as a fisherman. Fisheries modernization is carried out through the provision of PUMP assistance, training, and socialization. The assistance obtained by fishermen is considered not yet on target so that only a small portion of fishermen feel the benefits of the assistance.
