

## INTISARI

Penelitian ini bertujuan untuk mengkaji implementasi keselamatan dan keamanan pada atraksi wisata *speed boat* di Telaga Sarangan. Telaga Sarangan merupakan destinasi populer yang menarik minat wisatawan dengan adanya berbagai atraksi wisata, khususnya *speed boat*. Namun, terdapat permasalahan terkait keselamatan wahana *speed boat* yang belum sepenuhnya terpenuhi, seperti kurangnya fasilitas keselamatan standar. Penelitian ini menjadi relevan karena belum ada penelitian mendalam yang membahas aspek keselamatan dan keamanan di destinasi wisata Telaga Sarangan. Dengan fokus pada keselamatan dan keamanan, penelitian ini bertujuan untuk mengidentifikasi kesesuaian Standar Operasional Prosedur (SOP) dengan standar peraturan yang berlaku, serta mengidentifikasi peran para *stakeholder* dalam penerapan SOP guna meminimalisir risiko kecelakaan dan meningkatkan keamanan terhadap penumpang *speed boat* Sarangan. Melalui pendekatan deskriptif kualitatif, hasil penelitian menunjukkan bahwa penerapan SOP *speed boat* masih belum optimal, terbukti dari pelanggaran seperti kelalaian penggunaan *life jacket* dan perilaku mengemudi yang tidak bertanggung jawab. Temuan juga mengungkap adanya kesenjangan antara SOP *speed boat* dan peraturan yang berlaku, yang berpotensi meningkatkan risiko kecelakaan. Selain itu, peran dan keterlibatan para *stakeholder* dalam penerapan SOP perlu ditingkatkan untuk memastikan keselamatan dan keamanan penumpang *speed boat* di Telaga Sarangan lebih terjamin.

**Kata Kunci:** *Speed Boat*, Standar Operasional Prosedur, *Stakeholder*, Telaga Sarangan.

## ABSTRACT

*This research aims to examine the implementation of safety and security at speed boat tourism attraction in the Sarangan Lake. Sarangan Lake is a popular destination that attracts tourists with various tourism attractions, especially speed boat rides. However, there are problems related to the safety of speed boat rides that have not been fully addressed, such as the lack of standard safety facilities. This research is relevant because there has been no in-depth study discussing the safety and security aspects of Sarangan Lake as a tourism destination. With a focus on safety and security, this research aims to identify the suitability of Standard Operating Procedure (SOP) with applicable regulatory standards and to identify the role of stakeholders in implementing SOPs to minimize the risk of accidents and increase safety for passengers of Sarangan speed boat. Using a qualitative descriptive approach, the research findings indicate that the implementation of SOPs for speed boats is still suboptimal, as evidenced by violations such as the neglect of life jacket usage and irresponsible driving behavior. The findings also highlight a discrepancy between the SOPs and applicable regulations, which could potentially increase the risk of accidents. Furthermore, the role and involvement of stakeholders in implementing the SOPs need to be enhanced to ensure better safety and security for speed boat passengers at Sarangan Lake.*
