LIST OF FIGURES	xi
NOMENCLATURE	xiii
ABSTRACT	xvi
INTISARI	1
I INTRODUCTION	1
1.1 Background	1
1.2 Problem Formulations	6
1.3 Research Purposes and Impacts	10
1.3.1 Research purposes	11
1.3.2 Impacts	12
1.4 Literature Review and Novelty	13
1.4.1 Literature review	13
1.4.2 Novelty	16
1.5 Research Methods	17
1.5.1 Linear problem at $\mathcal{O}(1)$ level	18
1.5.2 Nonlinear problem at $\mathcal{O}(1)$ level	19
1.6 Overview of the chapters	20
II BASIC THEORY	22
2.1 Delay Differential Equations	22
2.1.1 Definition	22
2.1.2 The Existence and Uniqueness Theorems	24
2.2 The Exponential Solution	26
2.3 System of First Order DDEs	30
2.4 Stability Analysis	35
2.4.1 Definition and analysis	35
2.4.2 Pontryagin Criterion	37
2.5 Laplace Transformation	39

2.5.1	Definition and Properties	40
2.5.2	Inverse Laplace Transform	45
2.6	Perturbation Theory	52
2.6.1	Order Symbols	52
2.6.2	Asymptotic Expansion	54
2.6.3	Multiple Time-Scales perturbation method	61
2.6.4	Validity analysis	63
2.7	Difference Operators	65
2.8	The Classical Lotka-Volterra System	67
2.9	Properties of the First Integral	70
2.10	Melnikov Method	73
III LINEAR DDE AT THE ORDER-1 LEVEL		78
3.1	The Multiple Scales Perturbation Method for DDEs	78
3.1.1	First order DDEs	80
3.1.2	Second order DDEs	84
3.2	Accuracy of the Approximations on a Long Time-Scale	91
3.3	Advanced Problems	97
3.3.1	A first order DDE with a weak quadratic nonlinearity	97
3.3.2	A second order DDE with a weak quadratic nonlinearity.	100
3.3.3	A first order DDE with a weak cubic nonlinearity.	104
3.3.4	A second order DDE with a weak cubic nonlinearity	107
3.4	Analytical and Numerical Approximations	110
IV NONLINEAR DDES AT THE ORDER-1 LEVEL		116
4.1	Lotka-Volterra System	117
4.1.1	Perturbed Lotka-Volterra	117
4.1.2	Delayed Lotka-Volterra	126
4.2	Others problem	130
V SUMMARY		133
5.1	Conclusions	133
5.2	Suggestions	134
REFERENCES		135
A CHARACTERISTIC EQUATION		145
1.1	Solution Curves	145
1.2	Stability Region	146
1.3	Roots Multiplicity	158
B SOLUTIONS OF LINEAR DDEs USING THE LAPLACE TRANSFORMS		

METHOD	162
2.1 Problem 3.13	162
2.2 Problem 3.33	165
C DIMENSIONAL ANALYSIS	168
