

## TABLE OF CONTENTS

Chapter 1: Introduction .....	10
Chapter 2: Green hydrogen's potential and global market prospects.....	13
2.1 Pathways for hydrogen utilization .....	13
2.2 Advantages of green hydrogen.....	14
2.3 Global efforts on green hydrogen .....	17
Chapter 3: The Philippine Landscape .....	19
3.1 Philippine GDP, energy crisis, and climate change commitments.....	19
3.2 The Philippine Energy Plan (PEP).....	19
3.3 Renewable energy stocktake and projections .....	20
3.4 The Philippine Government's initiatives on hydrogen .....	22
3.5 Green hydrogen-related initiatives involving the private sector.....	24
3.5.1 Feasibility and exploration studies.....	24
3.5.2 Retrofitting projects .....	24
3.5.3 Fuel cell technology projects .....	25
3.5.4 Hydrogen production projects.....	25
3.6 Green Hydrogen Prospects in the Philippines .....	26
Chapter 4: Theoretical foundation .....	30
4.1 Stakeholder theory .....	30
Power .....	30
Legitimacy .....	31
Urgency .....	32
Salience and stakeholder classification.....	33
Salience types.....	35
4.2 The Perspective of Actor-Network Theory .....	37
4.3 Incorporating the Network of Influence .....	38
4.4 Shared Value Creation among Stakeholders .....	39

Chapter 5: Research framework and methodology.....	41
Chapter 6: Empirical findings.....	46
6.1 Stakeholder identification and salience categorization.....	46
6.1.1 Primary stakeholders.....	46
6.1.2 Secondary stakeholders.....	56
6.2 Challenges.....	57
6.2.1 Economic .....	57
6.2.2 Financing.....	58
6.2.3 Infrastructural.....	58
6.2.4 Legal .....	59
Chapter 7: Systematic discussion.....	60
7.1 Overview of the Philippine green hydrogen landscape .....	60
7.2 Strategic players in the development of a green hydrogen economy .....	60
7.3 Stakeholder network of green hydrogen economy development.....	61
7.3.1 Market Drivers for green hydrogen economy development (GH2D).....	62
7.3.2 Primary stakeholders: multi-stakeholder approach and the triple helix.....	63
7.3.3 Secondary stakeholder relationships.....	65
7.4 Potential conflicts and priorities .....	67
Disjunct on DOE and ADB's current priorities .....	67
DOE and ADB's alignment on green hydrogen economy development .....	68
7.5 Stature of the Philippine power industry and green hydrogen.....	69
Chapter 8: Recommendations .....	71
8.1 Foundational aspects of green hydrogen economy development .....	71
8.2 Knowledge contextualization.....	72
8.3 Policy strengthening.....	72
8.4 Capacity-building.....	73
Chapter 9: Conclusion.....	74

Study limitations and further research .....	75
References.....	<b>Error! Bookmark not defined.</b>
Appendix.....	93
Appendix A. Interview Respondents .....	93
Appendix B. Interview protocol template.....	95

## FIGURES

Figure 1. Green hydrogen production, conversion and end uses across the energy system ---	13
Figure 2. The comparison, emphasizing the environmental benefits and potential of green hydrogen against other clean energy options-----	16
Figure 3. World Bank's 4-point action plan for clean hydrogen deployment-----	17
Figure 4. Green hydrogen production by various countries-----	18
Figure 5. The Philippines' Total Primary Energy Supply Mix-----	20
Figure 6. GHG Emission, by sector and activity, of the 2022 Philippine energy mix-----	20
Figure 7. REF and CES in the Philippine Energy Plan 2020-2040.-----	21
Figure 8. The Hydrogen Energy Value Chain from DC2024-01-0001. -----	23
Figure 9. Total final energy consumption in the Philippines from 2012 to 2022 -----	27
Figure 10. Stakeholder Typology of Mitchell et al's (1997) Salience Model-----	34
Figure 11. Rowley's (1997) Network structures: relationship patterns-----	39
Figure 12. Freudenreich et al's (2019) stakeholder value creation framework-----	40
Figure 13. Conceptual Framework-----	41
Figure 14. Methodology outline-----	42
Figure 15. ADB's Renewable Energy Investments from 2016 to 2020.-----	54
Figure 16. Stakeholder network of green hydrogen economy development in the Philippines -----	63
Figure 17. Recommendations moving forward -----	71
