

Table of contents

I. INTRODUCTION.....	4
1.1. Background.....	4
1.1.1 History of the water stepping system.....	6
1.1.2 Chronology of construction up to the present day	6
1.2. Problem Statement	10
1.3. Research Questions	10
1.4. HUNGARY’S ENERGY MARKET	12
1.4.1 Production and distribution.....	12
1.4.2 Non renewables.....	13
1.4.3 Renewables	13
1.4.4 Energy imports.....	15
II. LITERATURE REVIEW/THEORETICAL FRAMEWORK	17
2.1. Theoretical Framework	17
2.1.1 Stakeholder theory	17
2.2.1.1. Who can be stakeholders?	21
2.2.1.2. Static stakeholder typologies	22
2.3.2 Stakeholder management	24
2.3.2.1. Stakeholder interests, stakeholder claims and contributions.	27
2.3.3 Theory application	29
III. RESEARCH METHODS	30
3.1.1 First phase of the research.....	30
3.1.1.1 Research design	31
3.1.1.2 Data collection method.....	31
3.1.1.3 Data Analysis.....	31
3.1.2.1 Second phase of the research.	32
3.1.2.2 Research design	32

3.1.2.3 Data collection.....	33
3.1.2.4. Data Analysis.....	34
IV. RESULTS AND DISCUSSION.....	35
4.1 Results of the first study	35
4.1.1 Hydropower improvement over the years.....	35
4.2.2 Cost analysis compared to other sources of Energy.....	37
4.2.3 Environmental risks	41
4.2.3.1. First argument.....	42
4.2.3.2. Second argument	43
4.2.4 Price drop calculation for an average household	44
4.2.5 Interview with the Ministry of Rural Development.....	45
4.2.6 Shipping	45
4.3. Discussions	46
4.3.1 Stakeholder categorisation	46
4.3.1 Findings.....	49
4.3.1.1 Findings by stakeholder types	49
4.3.2.1 General findings	53
4.3.3 Stakeholder engagement	53
V. CONCLUSION	55
5.1.Conclusion	55
5.2.Limitation and Future Research Possibilities.....	56
5.3 Recommendation	57
VI. BIBLIOGRAPHY	58
