

List of Table.....	6
List of Figure.....	7
List of Abbreviation.....	8
Abstract.....	9
Intisari.....	10
1. Introduction.....	11
1.1 Background.....	11
1.2 Problem Formulation.....	13
1.3 Research Question.....	14
1.4 Aim of Research.....	14
1.5 Research Benefit.....	14
1.6 Research Authenticity.....	16
2. Literature Review	17
2.1 Acute Kidney Injuries	17
2.1.1 Definition.....	17
2.1.2 Epidemiology.....	17
2.1.3 Pathophysiology of AKI	18
2.1.4 Diagnosis.....	19
2.1.5 Progression to CKD.....	21
2.2 Cisplatin.....	21
2.2.1 Indication and use.....	21
2.2.2 Pharmacodynamic.....	22
2.2.3 Pharmacokinetics.....	22
2.2.4 Mechanism of underlying Nephrotoxicity.....	23
2.2.4.1 Inflammation and Apoptosis in Cisplatin Nephrotoxicity.....	23
2.2.4.2 Cisplatin-Induced Kidney Injury.....	24
2.3 Aerobic Exercise and Drug-Induced Nephrotoxicity.....	24
2.3.1 Overview of Intensity Aerobic Training.....	24
2.3.2 Exercise Dosing.....	25
2.3.2.1 Exercise Frequency.....	25
2.3.2.2 Exercise Intensity.....	27
2.3.2.3 Exercise Time	27

2.3.2.4 Exercise Type.....	27
2.3.3 Physiological Impacts of Aerobic Exercise.....	27
2.3.4 Aerobic Exercise and Kidney Injury.....	29
2.3.4.1 Aerobic Exercise & Drug Induced Nephrotoxicity.....	30
2.3.4.2 FITT implications in Aerobic Exercise againts Kidney Injuries..	30
2.4 Theoretical Framework.....	32
2.5 Conceptual Frameworks.....	33
2.6 Hypothesis.....	34
3. Methodology.....	35
3.1 Research Design	35
3.1.1 Research Location.....	35
3.2 Research Subject.....	35
3.2.1 Population.....	35
3.2.2 Sample.....	35
3.3 Animal Grouping.....	34
3.4 Research Tools and Material.....	36
3.4.1 Cisplatin.....	34
3.4.2 Animal.....	34
3.4.3 Tools.....	35
3.5 Animal Grouping	35
3.5.1 Grouping.....	36
3.6 Research Variables and Operational Definition.....	36
3.6.1 Research Variables.....	36
3.6.2 Operational Definition.....	36
3.7 Acclimatization and Exercise Dosing on each individual rats.....	38
3.7.1 Acclimatization.....	38
3.7.2 Exercise Dosing.....	38
3.8 Exercise Protocol.....	39
3.8.1 Treadmill Setup.....	39
3.8.2 Warm-up Phase.....	39
3.8.3 Main Exercise Phase.....	39
3.8.4 Cool Down Phase.....	43
3.8.5 Non-Exercise Group.....	44
3.9 Kidney Injury Induction with Cisplatin	45

3.10	Data Collection.....	45
3.10.1	Blood Urea Nitrogen (BUN).....	45
3.10.2	Creatinine.....	45
3.10.3	Histopathology.....	45
3.11	Data Analysis.....	45
3.12	Research Design	44
4.	Results and Discussion.....	45
4.1	Results.....	45
4.2	Discussion.....	52
5.	Conclusion and Recommendation.....	55
5.1	Conclusion	55
5.2	Recommendation.....	56
6.	Bibliography.....	58
6.1	Appendix.....	65

UNIVERSITAS
GADJAH MADA

Protective effect of short-term low intensity aerobic exercise against cisplatin-induced kidney injury in male Wistar rats (*Rattus norvegicus*): A renal function and histopathological approach.
Arsa Taufiq Wirawan, dr. Dwi Aris Agung Nugrahaningsih, M.Sc, Ph.D ; Dr. dr. Denny Agustiningsih, M.Kes., AIFM, A

LIST OF TABLES

Research Authenticity.....	16
Renal Function Parameters.....	53

LIST OF FIGURES

Theoretical Framework.....	29
Conceptual Framework.....	30
Research Design.....	39
Research Timeline.....	42
BUN levels.....	43
Plasma Creatinine levels.....	45
Histopathological Imaging.....	46
Histopathological Score.....	47
Linear regression analysis on Histopathologic score with Plasma creatinine.....	52
Linear regression analysis on Histopathologic score with BUN.....	53

LIST OF ABBREVIATION

AKI: Acute Kidney Injury

ATN: Acute Tubular Necrosis

AIN: Acute Interstitial Nephritis

CKD: Chronic Kidney Disease

ESRD: End-Stage Renal Disease

ROS: Reactive Oxygen Species

BUN: Blood Urea Nitrogen

GPx: Glutathione Peroxidase

MET: Metabolic Equivalent

NSAID: Non-Steroidal Anti-Inflammatory Drug

1RT: One Repetition Maximum

FITT: Frequency, Intensity, Time, Type

DNA: Deoxyribonucleic Acid

MDA: Malondialdehyde
