

## **Bibliographies and References**

To support my writing ideas in this report, I also used Artificial Intelligence with details as follow

1. ChatGPT:
  - Generate ideas but direct copy-pasting even though paraphrase tools were not used. These are specifically for the sections of topics for the interview questions (and what kind of questions are appropriate), also on the KPIs metrics used on the recommendations.
  - Proofreading for grammatical errors.
2. Perplexity:
  - Journals for reference and citation
3. QuillBot:
  - Grammatical corrections and improved wordings.
