TITLE PAGE.....	i
APPROVAL PAGE	ii
APPROVAL PAGE BY SUPERVISORY COMMITTEE	iii
APPROVAL PAGE BY EXAMINATION COMMITTEE	iv
PROMOVENDUS STATEMENT	v
DECLARATION OF GENERATIVE AI USAGE.....	vi
PREFACE	vii
TABLE OF CONTENTS	ix
LIST OF TABLES.....	xiv
LIST OF FIGURES	xvi
LIST OF SYMBOLS AND ABBREVIATIONS.....	xviii
ABSTRACT.....	xix
CHAPTER I INTRODUCTION.....	1
1.1 Background.....	1
1.2 Problem Formulation	5
1.3 Scope of Problem	6
1.4 Research Novelty.....	6
1.5 Research Objectives.....	9
1.6 Hypothesis.....	10
1.7 Research Contributions.....	10
1.8 Research Impact	12
1.9 Overview of the Dissertation Report.....	13
CHAPTER II LITERATURE REVIEW.....	15
2.1 Introduction.....	15
2.2 Systematic Literature Review (SLR)	15
2.2.1 Research Question Formulation	16
2.2.2 Literature Search and Primary Studies Selection	17
2.2.3 Data Extraction Process	19
2.2.4 Assessment of Research Quality and Data Synthesis.....	19
2.2.5 SLR Result	20
2.2.5.1 [RQ1] Dataset.....	20
2.2.5.2 [RQ2] Classifier for Emotion Recognition.....	21
2.2.5.3 [RQ3] Classifier with the Best Performance in Emotion Recognition.....	22
2.2.5.4 [RQ4] Contribution Type of Research on Emotion Recognition.....	25
2.2.6 SLR Findings.....	26
2.2.6.1 The Potential of Multi-Representation of EEG Signals	26

2.2.6.2	Exploring Input Formulation using Image Representations of EEG Signals	27
2.3	Methodological Approaches in Emotion Recognition using EEG Signals	28
2.3.1	Rationale Behind Signal Representation Choices for EEG-Based Emotion Recognition	28
2.3.1.1	Rationale for Spectrogram Utilization in EEG Signal Encoding	28
2.3.1.2	Rationale for Recurrence Plots Utilization in EEG Signal Encoding	29
2.3.2	Justification for Selecting Pix2pix in Generating Synthetic Image Samples.....	29
2.3.3	Justification for Selecting Validation Scheme in Classification Task	30
2.3.3.1	Validity of Train-Validation-Test Split in EEG Data Augmentation for Emotion Recognition.....	30
2.3.3.2	Rationale for Implementing 10-Fold Cross-Validation in EEG-Based Emotion Recognition	30
2.3.3.3	Advantages of Subject-dependent Validation in EEG-Based Emotion Recognition	31
2.3.4	Justification for the Selection of CNN Architectures in EEG-based Emotion Recognition	32
2.3.5	Selection of Performance Metrics for Evaluation	33
2.3.6	Rationale Behind Statistical Test Choices in Classifier Performance Validation	34
2.3.6.1	Justification for Employing the McNemar Test	34
2.3.6.2	Justification for Employing the Wilcoxon Signed-rank Test	35
2.3.6.3	Justification for Employing the Paired t-test	35
2.3.7	Bayesian Optimization for EEG-Based Emotion Model Tuning	36
2.4	Summary.....	36
CHAPTER III FUNDAMENTAL CONCEPTS.....		37
3.1	Introduction.....	37
3.2	Brain Computer Interface	37
3.2.1	EEG Modality	38
3.2.2	Categories of Classification Task on EEG Modality.....	38
3.3	Definitions and Mechanisms of Emotion in EEG-based BCI	39
3.3.1	Emotion	39
3.3.2	Electroencephalography	40
3.3.2.1	EEG Placement System	42
3.3.2.2	Emotion in the Human Brain.....	43
3.3.2.3	Emotion Recognition using EEG Signals	44
3.4	Theoretical Background.....	45

3.4.1	Deep Learning Models	45
3.4.1.1	Convolutional Neural Network	45
3.4.1.2	Generative Adversarial Network	58
3.4.2	Signals to Image Encoding.....	62
3.4.2.1	Spectrogram	62
3.4.2.2	Recurrence Plot	63
3.4.3	Bayesian Hyperparameter Tuning.....	64
3.4.4	Statistical Hypothesis Testing	65
3.4.4.1	McNemar Statistical Test	65
3.4.4.2	Wilcoxon Statistical Test	66
3.4.4.3	Paired t-Test	66
3.5	Summary.....	67
CHAPTER IV METHODOLOGY		68
4.1	Introduction.....	68
4.2	Hardware and Software.....	68
4.3	Dataset	68
4.4	Research Methodology.....	70
4.4.1	EEG Signals Encoding.....	72
4.4.2	Synthetic Sample Generation using Pix2pix.....	73
4.4.2.1	Data Acquisition and Preprocessing	73
4.4.2.2	Synthetic Samples Assessment.....	75
4.4.3	Conceptual Framework of the Proposed Methodology.....	75
4.4.4	Advanced Input Formulation.....	76
4.4.4.1	Multi-representation Input Formulation	76
4.4.4.2	Advanced Recurrence Plots Input Formulation	79
4.5	Experiment Design	84
4.5.1	EEG Signals Encoding Details.....	84
4.5.1.1	Spectrogram encoding	84
4.5.1.2	Recurrence plots encoding	86
4.5.1.3	Validation of EEG signal representations through vi- sual analysis	87
4.5.2	Performance Benchmarking of Conventional vs. Automated Feature Extraction Methods in Emotion Recognition	89
4.5.3	Advanced Data Augmentation Scheme	90
4.5.3.1	Pix2pix Model Implementation Details	90
4.5.3.2	Data Augmentation Framework.....	92
4.5.3.3	Pretrained CNN-based Classifier Settings	93
4.5.3.4	Win-Loss Analysis of Data Augmentation Efficacy ...	95
4.5.4	Subject-dependent Validation Implementation	95
4.5.5	Advanced Input Formulation Implementation	96
4.5.5.1	Multi-representation Input Formulation Implemen- tation Details	96

4.5.5.2	AWRP Input Formulation Implementation Details ...	97
4.5.6	Bayesian Optimization Procedure.....	99
4.5.7	Conditional Methodology for Data Representation and Visualization	100
4.5.7.1	Colormap Selection in EEG Data Visualization.....	100
4.5.7.2	Tensor Representation for Encoded EEG Signal Data	100
4.6	Summary.....	102
CHAPTER V RESULTS AND DISCUSSION		103
5.1	Introduction.....	103
5.2	Performance Benchmarking Evaluation of Conventional vs. Automated Feature Extraction Methods in Emotion Recognition	103
5.3	Data Augmentation Schemes Performance Result.....	105
5.3.1	Performance on Different Number of Appended Training Data	105
5.3.1.1	Classification Performance on DEAP Dataset	105
5.3.1.2	Classification Performance on SEED Dataset	108
5.3.1.3	Generalization of Data Augmentation for DEAP and SEED Datasets	110
5.3.2	The Best Data Augmentation Scheme	111
5.3.2.1	Data Augmentation Scheme Win-Loss analysis on the use of DEAP Dataset	111
5.3.2.2	Data Augmentation Scheme Win-Loss analysis on the use of SEED Dataset	112
5.3.3	Accuracy Improvement	113
5.3.4	Discussion	114
5.3.4.1	Result Findings.....	114
5.3.4.2	Limitations	115
5.4	Advanced Input Formulation Performance Evaluation	116
5.4.1	Multi-representation Input Formulation Performance Result ...	116
5.4.1.1	Performance Evaluation on DEAP dataset.....	116
5.4.1.2	Performance Evaluation on SEED dataset	118
5.4.1.3	Discussion.....	121
5.4.2	Advanced Recurrence Plots Input Formulation Performance Result	122
5.4.2.1	Classification Performance on Different Window Sizes	122
5.4.2.2	Hypothesis Test Analysis	124
5.4.2.3	Comparative Entropy Analysis of Encoding Methods	126
5.4.2.4	Time and Space Complexity in Generating AWRP Samples.....	127
5.4.2.5	Empirical and Theoretical Analysis of Memory Usage and Running Time in AWRP Encoding	128
5.4.2.6	Conceptual Explanation of AWRP and Memory Efficiency.....	130

5.4.2.7	AWRP with Higher Window Size.....	130
5.4.2.8	Discussion.....	135
5.5	Comparison with Related Works	136
5.5.1	Data Augmentation Performance Result Comparison	136
5.5.2	Advanced Input Formulation Performance Result Comparison	138
5.6	Summary.....	139
CHAPTER VI CONCLUSION AND RECOMMENDATIONS		141
6.1	Conclusion	141
6.2	Recommendations	142
REFERENCES		143
APPENDIX		L-1
Appendix 1: Class Distributions		L-1
Appendix 2: Summary of Architecture and Hyperparameters for LSTM.....		L-2
Appendix 3: Synthetic images and their confidence scores.		L-3
Appendix 4: F1 Score trends for augmentation across different classifiers.....		L-5
Appendix 5: Kappa trends for augmentation across different classifiers.		L-6
