PREFACE	vi
TABLE OF CONTENTS	viii
LIST OF SYMBOLS	x
ABSTRACT	xii
INTISARI	1
I INTRODUCTION	2
1.1. Topic's Background	2
1.2. Key Issues	3
1.3. Research Purposes	3
1.4. Literature Review	4
1.5. Research Methodology	9
1.6. Thesis Structure	9
II PRELIMINARIES	11
2.1. Order Theory	11
2.1.1. Partial Order	11
2.1.2. Directed-Complete Poset (dcpo)	23
2.1.3. Essential/Way-Below Relation	27
2.1.4. Continuous Domain	33
2.2. Point-Set Topology	38
2.2.1. Topological Spaces	38
2.2.2. Basis and Subbasis for a Topology	42
2.2.3. Neighborhoods, Interiors, and Closures	48
2.2.4. Separation Axiom	56
2.2.5. Specialization Order	57
2.2.6. Irreducible Sets and Sober Spaces	60
2.2.7. Compact Sets	63
2.3. Scott Topology	67
2.4. Axiom of Choice and Its Variations	72

III ESSENTIAL AND DENSITY TOPOLOGIES OF CONTINUOUS DOMAIN	78
3.1. Essential Topology	78
3.1.1. Relation Between Scott Topology and Essential Topology	84
3.1.2. Basis Through Essential Topology	91
3.1.3. Irreducible Sets and RINT Property in Essential Topology	97
3.2. Density Topology	102
3.2.1. Properties of Density Topology	103
3.2.2. Characterization of Basis in Density Topology	106
IV SUMMARY	114
4.1. Conclusion	114
4.2. Advice	115
REFERENCES	117
