

TABLE OF CONTENTS

STATEMENT	iii
PREFACE	iv
TABLE OF CONTENTS	vi
LIST OF TABLES	viii
LIST OF FIGURES	ix
LIST OF APPENDICES	x
LIST OF ABBREVIATIONS	xi
INTISARI	xiii
ABSTRACT	xiv
I. INTRODUCTION	1
1. Research Background	1
2. Problems	4
3. General Objectives	4
4. Benefits of the Research	4
5. Originality of the Research.....	5
II. LITERATURE STUDY.....	10
1. Literature Review.....	10
1.1 Rubber biosynthesis.....	11
1.2 Rubber breeding.....	12
1.3 Latex diagnosis	15
1.4 QTLs mapping and identification of genes underlying QTLs	17
2. Base of Theory	18
3. Hypothesis.....	19
III. MATERIALS AND METHODS	20
1. Materials.....	20
2. Time and Place.....	22
3. Methods.....	22
3.1. Field observation and analysis of clonal typology	22
3.2. Identification of QTLs.....	25
3.3. Identification of gene underlying QTLs	29
IV. RESULT AND DISCUSSION	30
1. Results	30
1.1. Field observation and analysis of clonal typology	30

UNIVERSITAS
GADJAH MADA

Genetic Analysis of Agronomic and Physiological Traits Related to Latex Yield in Rubber (*Hevea brasiliensis* Mull. Arg.)

Sigit Ismawanto, Prof. Dr. Ir. Taryono, M.Sc.; Prof. Dr. Siti Subandiyah, M.Agr.Sc.; Dr. Pascal Montoro

Universitas Gadjah Mada, 2025 | Diunduh dari <http://etd.repository.ugm.ac.id/>

1.2. Identification of QTLs.....	49
1.3. Identification of genes underlying QTLs.....	55
2. Discussion	57
2.1. Clonal typology based on initial yield and latex diagnosis is a method to select new rubber clones.....	57
2.2. Analysis of QTLs associated with agronomic and physiological parameters related to latex yield.....	62
2.3. The high-density map and the size of the population led to more precise detection of QTLs and identification of genes underlying QTLs.	64
V. CONCLUSIONS AND RECOMMENDATIONS.....	67
1. Conclusions.....	67
2. Recommendations.....	67
REFERENCES	68
APPENDICES	78
