| PREFACE .....  | vii  |
| GLOSSARY .....   | ix   |
| ABSTRACT .....   | x    |
| INTISARI.....  | xi   |
| TABLE OF CONTENTS .....  | xii  |
| LIST OF FIGURE.....  | xv   |
| LIST OF TABLE.....   | xvii |
| CHAPTER I INTRODUCTION .....                                       | 1    |
| 1.1 Background .....   | 1    |
| 1.2 Problem Statement .....  | 3    |
| 1.3 Research Objective .....                                       | 4    |
| 1.4 Research Benefit .....   | 5    |
| 1.5 Originality of the Research .....                              | 6    |
| CHAPTER II LITERATURE REVIEW AND THEORITICAL FOUNDATION            | 14   |
| 2.1 Literature Review.....   | 14   |
| 2.1.1 Application of AI in Heart Disease Diagnosis .....           | 14   |
| 2.1.2 Interpretability in Medical Predictive Models .....          | 16   |
| 2.1.3 XAI for Medical Model Interpretation.....                    | 16   |
| 2.1.4 Rule Extraction in Predictive Models for Heart Disease ..... | 18   |
| 2.2 Theoritical Foundation.....                                    | 18   |
| 2.2.1 Heart Disease .....  | 18   |
| 2.2.2 Predictive Variables for Heart Disease.....                  | 21   |
| 2.2.3 Exploratory Data Analysis .....                              | 24   |
| 2.2.4 Data Preprocessing.....                                      | 26   |
| 2.2.5 Principal Component Analysis.....                            | 28   |
| 2.2.6 Artificial Neural Network .....                              | 29   |
| 2.2.7 Light Gradient Boosting Machine.....                         | 31   |
| 2.2.8 Model Evaluation .....                                       | 32   |
| 2.2.9 Explainable Artificial Intelligence (XAI).....               | 35   |
| 2.2.9.1 SHapley Additive exPlanations (SHAP) .....                 | 36   |
| 2.2.9.2 Local Interpretable Model-agnostic Explanations .....      | 38   |
| 2.2.9.3 Permutation Feature Importance .....                       | 39   |
| 2.2.10 Rule Extraction.....  | 40   |

|                                       |   |     |
|---------------------------------------|---|-----|
| 2.2.11                                | Success Metric .....                              | 41  |
| 2.2.11.1                              | Simplicity Model .....                            | 41  |
| 2.2.11.2                              | Feature Importance Consistency .....              | 42  |
| 2.2.11.3                              | Comparative Accuracy .....                        | 44  |
| 2.2.12                                | Medical Practitioner Validation of XAI Model..... | 45  |
| 2.2.12.1                              | Technology Acceptance Model (TAM) .....           | 45  |
| 2.2.12.2                              | System Usability Scale (SUS).....                 | 46  |
| 2.2.12.3                              | Human-Centered AI (HCAI) .....                    | 47  |
| 2.3                                   | Hypothesis.....                                   | 47  |
| CHAPTER III METHODOLOGY .....         |   | 49  |
| 3.1                                   | Tools and Materials .....                         | 49  |
| 3.1.1                                 | Tools.....  | 49  |
| 3.1.2                                 | Materials.....                                    | 51  |
| 3.2                                   | Research Process.....                             | 54  |
| 3.2.1                                 | Research Stages.....                              | 54  |
| 3.3                                   | Design Systems.....                               | 58  |
| 3.3.1                                 | System Modularity .....                           | 65  |
| 3.4                                   | Analysis Method .....                             | 66  |
| 3.4.1                                 | Model Evaluation .....                            | 66  |
| 3.4.2                                 | Interpretation Analysis .....                     | 68  |
| 3.4.3                                 | Comparative Accuracy Analysis .....               | 69  |
| 3.4.4                                 | Final Rule Formulation Method.....                | 70  |
| 3.4.5                                 | Practitioner Validation.....                      | 74  |
| 3.4.5.1                               | Expert Interview Question Formulation.....        | 74  |
| 3.4.5.2                               | Expert Evaluation Scenario .....                  | 76  |
| 3.4.5.3                               | Questionnaire Design and Instruments .....        | 79  |
| 3.4.5.4                               | Data Collection Method .....                      | 79  |
| 3.4.5.5                               | Analysis Techniques .....                         | 80  |
| 3.4.5.6                               | List of Questions .....                           | 82  |
| CHAPTER IV RESULT AND DISCUSSION..... |   | 84  |
| 4.1                                   | Preliminary Review of Results .....               | 84  |
| 4.2                                   | Research Result.....                              | 84  |
| 4.2.1                                 | Exploratory Data Analysis .....                   | 84  |
| 4.2.2                                 | Data Preprocessing.....                           | 131 |
| 4.2.3                                 | Principal Component Analysis.....                 | 135 |
| 4.2.4                                 | Splitting Dataset.....                            | 137 |
| 4.2.5                                 | Modeling .....                                    | 138 |
| 4.2.5.1                               | Cross-Validation .....                            | 138 |
| 4.2.5.2                               | Hyperparameter Tuning.....                        | 140 |
| 4.2.5.3                               | Plot Learning Curve .....                         | 146 |
| 4.2.5.4                               | Model Ensemble.....                               | 149 |
| 4.2.5.5                               | Model Artificial Neural Network .....             | 152 |
| 4.2.5.6                               | Model Evaluation .....                            | 154 |
| 4.2.6                                 | Model Light Gradient Boosting Machine .....       | 157 |
| 4.2.7                                 | Explainable Artificial Intelligence .....         | 161 |

|  |     |
|--|-----|
| 4.2.7.1 SHAP.....  | 161 |
| 4.2.7.2 Permutation Feature Importance .....               | 163 |
| 4.2.7.3 Feature Importance Gain LightGBM .....             | 164 |
| 4.2.7.4 LIME .....   | 166 |
| 4.2.7.5 Comparative XAI Results .....                      | 168 |
| 4.2.8 Rule Extraction.....                                 | 169 |
| 4.2.9 Evaluation Metrics .....                             | 171 |
| 4.3 Discussion .....                                       | 178 |
| 4.4 Validation of Results by Medical Practitioners.....    | 179 |
| 4.4.1 Validation Results .....                             | 179 |
| 4.4.1.1 Descriptive Statistic.....                         | 179 |
| 4.4.1.2 Quantitative Analysis .....                        | 182 |
| 4.4.1.3 Interpretation of Validation Results.....          | 184 |
| 4.5 Alignment with Research Objectives.....                | 186 |
| CHAPTER V CONCLUSION AND SUGGESTION .....                  | 189 |
| 5.1 Conclusion .....                                       | 189 |
| 5.2 Suggestion.....  | 190 |
| BIBLIOGRAPHY .....   | 192 |
| ATTACHMENT .....   | 202 |
| L.1 Sample Code : Load Library and Data Checking .....     | 202 |
| L.2 Sample Code EDA : Feature Corelation Analysis.....     | 202 |
| L.3 Sample Code Data Preprocessing : Balancing Data .....  | 203 |
| L.4 Sample Code PCA .....                                  | 203 |
| L.5 Sample Code ANN .....                                  | 204 |
| L.6 Sample Code Feature Extractor and LightGBM Model ..... | 205 |
| L.7 Sample Code SHAP .....                                 | 205 |
| L.8 Sample Code LIME.....                                  | 206 |
| L.9 Sample Code PFI .....                                  | 206 |
| L.10 Sample Code Rule Extraction .....                     | 207 |
| L.11 Sample Quiztioner.....                                | 207 |
| L.12 Sample Respon Responder.....                          | 208 |
| L.13 Documentation of Result Validation .....              | 208 |
