| ABSTRACT .....  | xiii |
| CHAPTER I.....  | 1    |
| INTRODUCTION .....  | 1    |
| I.1. Background.....  | 1    |
| I.2. Research problem.....                                  | 2    |
| I.3. Objectives .....                                       | 3    |
| I.4. Benefits.....  | 3    |
| I.5. Expected Outcomes.....                                 | 4    |
| CHAPTER II .....  | 5    |
| LITERATURE REVIEW .....                                     | 5    |
| II.1. Pectin.....   | 5    |
| II.2. Pectinase.....  | 6    |
| II.3. Pectinase application.....                            | 7    |
| II.4. Pectinase production .....                            | 8    |
| II.4.1. Source of pectinase.....                            | 8    |
| II.4.2. <i>Schizophyllum commune</i> .....                  | 8    |
| II.4.3. Methods of pectinase production .....               | 10   |
| II.4.4. Factors affecting the production of pectinase ..... | 12   |
| II.4.5. Recovery process of pectinase .....                 | 14   |
| II.5. Characteristics of pectinase .....                    | 16   |
| II.5.1. Pectinase's pH optimum and stability .....          | 16   |

|  |    |
|--|----|
| II.5.2. Effect of incubation temperature .....   | 17 |
| II.6. Research hypothesis .....  | 17 |
| CHAPTER III .....  | 19 |
| METHODOLOGY .....  | 19 |
| III.1. Materials and equipment .....   | 19 |
| III.1.1. Fungal isolates.....  | 19 |
| III.1.2. Chemicals .....   | 19 |
| III.1.3. Equipment and instruments .....   | 19 |
| III.2. Methods.....  | 20 |
| III.2.1. Research design.....  | 20 |
| III.2.2. Primary screening of microorganism for pectinase production .....   | 21 |
| III.2.3. Secondary screening of fungi in submerged fermentation .....  | 21 |
| III.2.4. Optimization of pectinase production .....  | 22 |
| III.2.5. Enzyme recovery and biomass determination .....   | 25 |
| III.2.6. Partial purification of enzyme.....   | 26 |
| III.2.7. Pectinase characterization.....   | 27 |
| III.2.8. Pectinase activity assay .....  | 28 |
| III.2.9. Protein assay .....   | 29 |
| III.2.10. Statistical analysis .....   | 29 |
| CHAPTER IV .....   | 30 |
| RESULTS AND DISCUSSION .....   | 30 |
| IV.1. Primary Screening.....   | 30 |
| IV.2. Secondary Screening.....   | 32 |
| IV.3. First Stage of Optimization: One Factor at A Time .....  | 33 |
| IV.3.1. Nitrogen source screening.....   | 33 |
| IV.3.2. Metal ion screening .....  | 36 |
| IV.3.3. Initial pH screening .....   | 38 |
| IV.4. Second Stage of Optimization: Response Surface Methodology (RSM)<br>with Central Composite Design (CCD)..... | 39 |
| IV.5. Effect of Incubation Period for Pectinase Production.....  | 43 |
| IV.6. Partial Purification of Pectinase.....   | 44 |
| IV.6.1. Pre-liminary study for partial purification of pectinase.....  | 44 |

|   |    |
|---|----|
| IV.6.2. Partial purification of pectinase.....        | 45 |
| IV.7. Pectinase Characteristics .....                 | 47 |
| IV.7.1. Optimum temperature and thermostability ..... | 47 |
| IV.7.2. Optimum reaction pH .....                     | 48 |
| IV.7.3. pH Stability of pectinase .....               | 49 |
| CHAPTER V .....                                       | 51 |
| CONCLUSION AND SUGGESTIONS .....                      | 51 |
| V.1. Conclusion .....                                 | 51 |
| V.2. Suggestions .....                                | 51 |
| REFERENCES .....                                      | 53 |
| APPENDICES .....                                      | 60 |
