

## TABLE OF CONTENTS

ACKNOWLEDGEMENTS .....	iv
LIST OF TABLES .....	ix
LIST OF FIGURES .....	x
LIST OF APPENDIXES .....	xi
CHAPTER I .....	1
INTRODUCTION .....	1
1.2. Research Question.....	3
1.3. Objectives.....	4
1.3.1. General Objectives .....	4
1.3.2. Specific Objectives.....	4
1.4. Benefit.....	4
1.5. Expected Outcomes.....	4
CHAPTER II.....	6
LITERATURE REVIEW.....	6
2.1. Probiotics .....	6
2.1.1. Definition of probiotic.....	6
2.2. Prebiotics.....	11
2.3. Synbiotics.....	15
2.4. Microencapsulated techniques .....	16
2.6. Yogurt .....	23
CHAPTER III .....	29
MATERIALS AND METHODS.....	29
3.1. Time and Location of Research .....	29
3.2. Equipment .....	29
3.3. Material .....	30
3.3.1. Raw material .....	30

3.3.2.	Chemical .....	30
3.4.	Research Variable .....	30
3.4.1.	Dependent Variable.....	30
3.4.2.	Independent Variable .....	31
3.4.3.	Control Variable.....	31
3.5.	Step of Research.....	31
3.6.	Methods.....	33
3.6.1.	Preparation of <i>Lacticaseibacillus casei</i> F2 .....	35
3.6.2.	Determination of needle size of microencapsulation .....	35
3.6.3.	Preparation of microencapsulation of <i>Lacticaseibacillus casei</i> F2 with addition of different prebiotics (inulin and starch from durian seed) .....	36
3.6.4.	The effect of coating polymer co-encapsulated <i>Lacticaseibacillus casei</i> F2 with prebiotics .....	37
3.6.5.	Survival of microencapsulated and free cells under simulated gastrointestinal conditions .....	37
3.6.6.	Yogurt preparation .....	38
3.6.7.	Survival of encapsulated <i>Lacticaseibacillus casei</i> F2 after yogurt preparation .....	39
3.6.8.	Titratable acidity and pH measurement of yogurt.....	39
3.6.9.	Texture analysis of yogurt.....	40
3.6.10.	Color measurements of yogurt .....	40
3.6.11.	Water holding capacity of yogurt.....	40
3.6.12.	Viscosity measurement of yogurt.....	41
3.6.13.	Sensory analysis of yogurt .....	41
3.6.14.	Assessment of Product Shelf Life During Storage .....	41
3.6.15.	Statistical analysis .....	42
3.7.	Layout of Research .....	42
3.7.1.	Determination of prebiotic concentration .....	42
3.7.2.	Determination of type of coating polymer .....	43

3.7.3. Assessment shelf life of yogurt .....	43
CHAPTER IV .....	45
RESULT AND DISSCUSSION .....	45
4.1. Determination of needle size on microencapsulated <i>Lacticaseibacillus casei</i> F2 and encapsulation efficiency (EE) .....	45
4.2. Determination of microencapsulated <i>Lacticaseibacillus casei</i> F2 with different prebiotics (inulin and starch from durian seeds).....	47
4.3. The effect of coating polymer co-encapsulated <i>Lacticaseibacillus casei</i> F2 with prebiotics .....	51
4.4. Survival of co-encapsulated and free cells under simulated gastrointestinal conditions .....	53
4.5. Determination of <i>L. casei</i> F2 viability during storage .....	55
4.6. Assessment of product shelf life during storage .....	57
4.7. Texture properties of yogurt with addition of encapsulated probiotics .....	61
4.8. Viscosity of yogurt with addition of encapsulated synbiotics .....	63
4.9. Color measurement of yogurt with addition of encapsulated synbiotics ....	65
4.10. Sensory evaluation of yogurt with encapsulated probiotics.....	66
CHAPTER V.....	70
CONCLUSION AND SUGGESTION .....	70
5.1. Conclusion .....	70
5.2. Suggestion.....	71
REFERENCES.....	73
APPENDICES .....	84

## LIST OF TABLES

<b>Table 1.</b> Codex standard 243-2003 for fermented milk .....	24
<b>Table 2.</b> Encapsulation efficiency and size of encapsulated <i>L. casei</i> F2.....	46
<b>Table 3.</b> Encapsulation efficiency and survival rates of encapsulated <i>L. casei</i> F2. ....	50
<b>Table 4.</b> Encapsulation efficiency and stability of polymer-coated microcapsules in simulated gastric fluid (pH 2 for 3 h).....	52
<b>Table 5.</b> Survival of free encapsulated probiotics after sequential incubation in simulated gastric fluid (SGF; pH 2 for 2 h) and simulated intestinal fluid (SIF; pH 8 for 4 h).....	54
<b>Table 6.</b> Survival rates of free encapsulated probiotics after sequential incubation in simulated gastric fluid (SGF; pH 2 for 2 h) and simulated intestinal fluid (SIF; pH 8 for 4 h).....	54
<b>Table 7.</b> Viable count of <i>L. casei</i> F2 during storage for 21 days. ....	56
<b>Table 8.</b> pH, titratable acidity, and water holding capacity of yogurt during storage at 4°C.....	60
<b>Table 9.</b> Texture analysis of yogurt during storage at 4°C.....	63
<b>Table 10.</b> Viscosity of yogurt during storage at 4°C.....	64
<b>Table 11.</b> Color properties of yogurt during storage at 4°C. ....	66
<b>Table 12.</b> Sensory evaluation of yogurt with encapsulated synbiotics.....	68

## LIST OF FIGURES

<b>Figure 1.</b> <i>Lacticaseibacillus casei</i> (Gobbetti, 1999).....	9
<b>Figure 2.</b> Prebiotic Functions (Kaur <i>et al.</i> , 2021). ....	12
<b>Figure 3.</b> Structure of Inulin (Richardson <i>et al.</i> , 2021).....	13
<b>Figure 4.</b> Structure of Fructooligosaccharides (Ibrahim, 2018) .....	14
<b>Figure 5.</b> Structure of Galactooligosaccharides (Ibrahim, 2018) .....	15
<b>Figure 6.</b> Emulsification Technique (Camelo-Silva <i>et al.</i> , 2022) .....	16
<b>Figure 7.</b> Extrusion Technique (Sultana <i>et al.</i> , 2022).....	18
<b>Figure 8.</b> Spray Drying (Rajam and Subramanian, 2022) .....	19
<b>Figure 9.</b> Freeze Drying (Bodzen <i>et al.</i> , 2020).....	20
<b>Figure 10.</b> Structure of Chitosan (Ibrahim and El-Zairy, 2015).....	21
<b>Figure 11.</b> Structure of Carrageenan (Nasrollahzadeh <i>et al.</i> 2021).....	22
<b>Figure 12.</b> Structure of Gelatin (Rather <i>et al.</i> , 2022).....	23
<b>Figure 13.</b> Flow chart of making cow milk yogurt (Lee and Lucey, 2010) .....	26
<b>Figure 14.</b> The 9-point hedonic scale (Thomareis and Dimitreli, 2022).....	28
<b>Figure 15.</b> Flow chart encapsulation <i>L. casei</i> F2 with different sizes of needles. ....	31
<b>Figure 16.</b> Flow chart of encapsulation <i>L. casei</i> F2 with different types of prebiotic and microcapsules coating.....	32
<b>Figure 17.</b> Flow chart of making encapsulated synbiotic yogurt.....	33
<b>Figure 18.</b> Microencapsulation <i>Lacticaseibacillus casei</i> F2 with different sizes of needle (a) and Schematic representation of the microencapsulation process of <i>Lacticaseibacillus casei</i> F2 with alginate with addition inulin or durian seed starch, followed by coating and simulated digestion (b).....	34
<b>Figure 19.</b> Encapsulation of <i>L. casei</i> F2 with different sizes of needles 18g (a), 20g (b), and 24g(c). ....	46
<b>Figure 20.</b> Microcapsules with alginate (a), alginate and inulin (b), and alginate with starch from durian seeds (c). ....	50
<b>Figure 21.</b> Correlation between pH and viable cell count of <i>L.casei</i> F2 during 21-days storage periods.....	57

## LIST OF APPENDIXES

<b>FLOW CHART</b> .....	84
<b>RESULT OF DATA ANALYSIS</b> .....	92
<b>PICTURE</b> .....	152
