ACKNOWLEDGMENT SHEET	ii
DECLARATION OF ACADEMIC INTEGRITY	iii
ACKNOWLEDGEMENTS	iv
PREFACE	v
TABLE OF CONTENTS	vi
LIST OF TABLES	ix
LIST OF FIGURES	x
LIST OF NOMENCLATURE	xiv
ABSTRACT	xvii
CHAPTER 1 INTRODUCTION	1
1.1 Background	1
1.2 Research Questions	3
1.3 Aims	3
1.4 Objectives	3
1.5 Scope of The Research	4
1.6 Thesis Framework	4
1.6.1 Introduction	4
1.6.2 Literature Review	4
1.6.3 Methodology	5
1.6.4 Result	5
1.6.5 Discussions	5
1.6.6 Conclusions and Recommendations	5
CHAPTER 2 LITERATURE REVIEW	6
2.1 Aerodynamic of the Train-Tunnel System	6
2.2 Pressure Wave	7
2.2.1 Train shape	9
2.2.2 Train length	9
2.2.3 Train speed	10
2.3 Slipstream	10
2.4 Compressibility of Fluid	12
2.5 Novelty in Research	15
CHAPTER 3 METHODOLOGY	20
3.1 Research Procedures	20
3.2 Research Tools	21
3.3 Proposed Concept of 2-Dimensional Model of Moving Train Modeling	21
3.4 Remodeling Concept of Transforming 3D Model Into 2D Model	24
3.4.1 Defining geometry inputs	24
3.4.2 Defining mesh, boundary conditions, and numerical solutions	26

3.4.3 Validating result	30
3.5 Implementing 2D Moving Train Concept for Scale Modeling with Realistic Shape	31
3.5.1 Defining geometry inputs of realistic model of train	32
3.5.2 Defining mesh, boundary conditions, and numerical solutions.....	34
3.6 Implementing Condition of High-Speed Train Meet Freight Train in Tunnel (case study High Speed 1 line).....	39
3.6.1 Defining geometry inputs of north downs tunnel in HS1 scenario	40
3.6.2 Defining mesh, boundary conditions, and numerical solutions.....	45
CHAPTER 4 RESULT	51
4.1 Parameter Validation of Proposed Model of Transforming 3D Model to 2D Model	51
4.1.1 Inlet velocity of two-dimensional model with k-epsilon-standard unsteady RANS model	52
4.1.2 Outlet velocity of two-dimensional model with k-epsilon-standard unsteady RANS model	53
4.1.3 Validation of result	54
4.2 Scale Modeling with Realistic Shape Geometry and Effect of Realistic Condition	57
4.2.1 Incompressible flow	57
4.2.2 Compressible flow	59
4.3 High-Speed Train Meet Freight Train In Tunnel.....	60
4.3.1 Numerical Parameter	61
4.3.2 Mesh independence study.....	61
4.3.3 Case study of a high-speed train meet with a freight train in the HS1 tunnel	65
CHAPTER 5 DISCUSSION.....	76
5.1 Recommended Preliminary Requirements for Modeling Transformation of Simple 3D to 2D Models 2D Model is Suggested for the Purpose of Research.	76
5.2 A Selective Method for Modeling Simple 3D into 2D Models with an Acceptable Level of Confidence.....	77
5.3 A Reasonable Method for Modeling a Scale-Sized Realistic Shape Geometry in 3D Into 2D Model	78
5.4 Application of 3D to 2D Transforming Model Into Case Study in HS 1	78
5.5 Aerodynamic Phenomenon Between High-Speed Train and Freight Train Meeting in The Tunnel	79
CHAPTER 6 CONCLUSIONS AND RECOMMENDATION	82
6.1 Conclusions.....	82
6.2 Recommendation	82
REFERENCES	84
Appendix A USER-DEFINED FUNCTION	87
Appendix B CROSS SECTION GEOMETRY	90

Appendix C CALCULATION OF TRAIN GEOMETRY	93
Appendix D ANSYS PROJECT REPORT	98
Appendix E ANSYS FLUENT SIMULATION REPORT.....	125
