TITLE PAGE	i
APPROVAL PAGE	ii
APPROVAL PAGE BY SUPERVISORY COMMITTEE.....	iii
APPROVAL PAGE BY EXAMINATION COMMITTEE	iv
PROMOVENDUS STATEMENT	v
PREFACE.....	vi
TABLE OF CONTENTS	vii
LIST OF TABLES.....	x
LIST OF FIGURES	xii
LIST OF SYMBOLS AND ABBREVIATIONS.....	xv
ABSTRACT.....	xviii
CHAPTER I INTRODUCTION	1
1.1 Background	1
1.2 Problems Formulation.....	4
1.3 Research Objective.....	5
1.4 Research Limitations	5
1.5 Research Authenticity and Contributions.....	6
1.6 Benefits of Research	10
1.7 Dissertation Outline.....	11
CHAPTER II LITERATURE REVIEW.....	12
2.1 Previous Research	12
2.1.1 Data Nonlinearization in Equation Discovery	14
2.1.2 The Thresholding Technique of Equation Discovery	16
2.1.3 Accuracy and Robustness Improvement in Equation Discovery	18
2.1.4 Output Equation of Equation Discovery.....	19
2.1.5 Online Implementation of Equation Discovery	22
2.1.6 Research Gap	25
2.2 Fundamental Theories.....	28
2.2.1 Robot and its equations of motion	28
2.2.2 System Identification.....	31
2.2.3 Regression Analysis.....	37
2.2.4 Complexity Analysis	42
2.2.4.1 Space Complexity	43
2.2.4.2 Time Complexity	43
CHAPTER III RESEARCH METHODOLOGY.....	45
3.1 Research Workflow	45
3.1.1 Determining The Topic	45
3.1.2 Literature Review	45

3.1.3	Problem-Solving Design	46
3.1.4	Evaluation and Verification	46
3.1.5	Publication.....	46
3.2	Experiment setup	47
3.3	Data Collection	48
3.3.1	Model Simulation	49
3.3.2	ROB3 Robot Manipulator (Published in [82])	50
3.3.3	KUKA Robot Arm Manipulator.....	54
3.4	Method Design.....	54
3.4.1	Dynamic Expression Nonlinearization (Published in [82])	55
3.4.2	Variable Segregation Algorithm(Published in [82])	57
3.4.3	LASSO Model Selection Criteria With Variable Segregation (Published in [82]).....	61
3.4.4	Recursive Sparse Identification of Nonlinear Dynamics (Pub- lished in [88])	65
3.4.4.1	Recursive Least Square	66
3.4.4.2	Recursive LASSO with Adam Optimizer	67
3.4.4.3	Online Model Selection Criteria	69
3.4.4.4	Parameter Changes Detector (PCD)	69
3.4.4.5	Algorithm of Recursive Sparse Identification of Non- linear Dynamics	73
3.5	Evaluations.....	75
CHAPTER IV RESULTS AND DISCUSSION		77
4.1	Publications	77
4.2	Data Collection and Preparation (Published in [82])	77
4.2.1	Dataset of Simulated Robotic Manipulator Model.....	78
4.2.2	Dataset of ROB3 Robotic Arm Manipulator	78
4.2.3	Dataset of KUKA Robotic Arm Manipulator	80
4.3	Data Nonlinearization	81
4.4	Offline Equation Discovery using LASSO Model Selection Criteria with Variable Segregation	82
4.4.1	Simulated 3-DoF Robotic Manipulator Model (Published in [82]) ..	83
4.4.2	ROB3 Robotic Arm Manipulator (Published in [82]).....	85
4.4.2.1	Case Study I	85
4.4.2.2	Case Study II	87
4.4.2.3	Case Study III	88
4.4.3	KUKA Robotic Arm Manipulator (Published in [94]).....	90
4.5	Online Equation Discovery using Recursive Sparse Identification of Non- linear Dynamic.....	97
4.5.1	Simulated 3-DoF Robotic Arm Manipulator Model.....	97
4.5.2	ROB3 Robotic Arm Manipulator	106
4.5.3	3-DoF KUKA Industrial Robotic Arm Manipulator	113

4.6	Effect The Configuration Parameters on the R-SINDy Performance	120
4.6.1	Recursive Least Square	120
4.6.2	Effect of RLS Forgetting Factor	122
4.6.3	Threshold Variation.....	122
4.6.4	Learning Rate	125
4.6.5	Numbers of epoch	126
4.6.6	First Moment Gradient β_1	127
4.6.7	Second Moment Gradient.....	128
4.6.8	Threshold Generator	129
4.6.9	The Comparison of Standard Nonlinearization.....	132
4.7	Results Evaluation.....	133
4.7.1	Results Summary	133
4.7.2	Strengths and Weaknesses of LMSCVS.....	134
4.7.3	Strengths and Weaknesses of R-SINDy	136
4.7.4	Key Findings from This Research	137
4.7.5	Research Contribution	138
4.7.6	Benefits and Implementation of Equation Discovery	140
CHAPTER V	Conclusions and Recommendations	141
5.1	Conclusion	141
5.2	Recommendation	142
REFERENCES	144
Appendix 1: Algorithm.....		L-1
Appendix 2: Nonlinear Function Library		L-5
Appendix 3: Discovered Equation.....		L-7
