LIST OF TABLES

	Page
TABLE 1. DEVELOPMENTAL PERIODS AND LIFE STAGES OF CATS.	16
TABLE 2. GENDER VS FACIAL EXPRESSION COMPARISON OF CATS ...	32
TABLE 3. LIFE STAGES VS FACIAL EXPRESSIONS COMPARISON OF CATS.....	35
ATTACHMENT 1. AGE AND GENDER-BASED DISTRIBUTION OF FACIAL EXPRESSIONS IN CATS	47

LIST OF FIGURES

	Page
Figure 1: Fear, anxiety, and stress scale	13
Figure 2. Relaxed state: resting on side, ears up but neutral, eyes half opened, tail still	17
Figure 3. Facial expressions, showing different combinations of increasingly offensive signals (towards the right column) and defensive signals (towards the bottom row)	21
Figure 4. The cat shows increased fear by bringing the feet closer to the body, lowering the head and making itself seem smaller	21
Figure 5. Physiological changes such as pupil dilation and whisker movement forward or backward indicate heightened alertness.....	21
Figure 6. Piloerection, displaying conflict between offensive and defensive motivations.....	22
Figure 7. Dilated pupils in cats indicate that they may be experiencing fear or distress during their veterinary visits	23
Figure 8. The cat is now preparing itself for fight. The back has become more arched and ears more flattened, suggesting that the cat is potentially more aggressive. (a few seconds later, the cat hissed and looked as if it would lunge forward).....	24
