DECLARATION OF ORIGINALITY	iii
PAGE OF DEDICATION	iv
PREFACE	vi
CONTENTS	vii
LIST OF TABLES.....	ix
LIST OF FIGURES	x
NOMENCLATURE AND ABBREVIATION	xi
INTISARI.....	xii
ABSTRACT	xiii
CHAPTER I Introduction	1
1.1 Background	1
1.2 Problem Statement.....	3
1.3 Research Objectives	3
1.4 Research Hypothesis.....	3
1.5 Scope and Limitations	4
1.6 Research Benefits	5
1.7 Thesis Structure	5
CHAPTER II Literature Review and Theoretical Framework.....	7
2.1 Related Works.....	7
2.1.1 Crowd Counting Approaches.....	7
2.1.1.1 Point-to-Point Network (P2PNet).....	8
2.1.2 Model Compression via Quantization.....	8
2.1.3 Pre-trained Lightweight Backbone Networks	9
2.1.3.1 ResNet Family	10
2.1.3.2 MobileNet Family	11
2.1.3.3 ShuffleNet.....	12
2.2 Theoretical Framework	14
2.2.1 Deep Learning.....	14
2.2.2 Computer Vision	15
2.2.3 Point-Based Object Detection as a Framework for Crowd Counting	16
2.2.4 Architectural and Numerical Optimization for Edge AI	16
2.2.5 Localization as a Bipartite Matching Problem.....	17
2.3 Comparative Analysis of Methods	17
CHAPTER III Research Methodology	20
3.1 Research Tools and Materials	20

3.1.1	Research Tools	20
3.1.2	Research Materials	21
3.2	Research Design	23
3.3	Methods	25
3.3.1	Data Preparation	25
3.3.1.1	Image Normalization	25
3.3.1.2	Data Augmentation	26
3.3.2	P2PNet Baseline Model.....	28
3.3.2.1	Core Architectural Components	29
3.3.2.2	Implementation and Training Details	30
3.3.3	Inference Framework	32
3.3.4	Model Compression.....	34
3.3.4.1	Modified Architecture	34
3.3.4.2	Static Quantization	35
3.3.5	Hungarian Matching Scheduler	36
3.3.6	Loss Computation.....	39
3.3.6.1	Classification Loss	39
3.3.6.2	Localization Loss	39
3.3.6.3	Matching Strategy and Loss Aggregation	39
3.3.7	Metric Performance	41
3.3.7.1	Counting Error with Mean Absolute Error (MAE)	41
3.3.7.2	Normalized Average Precision (nAP)	42
CHAPTER IV	Results and Discussion	44
4.1	P2PNet Baseline Performance	44
4.2	Main Result	44
4.3	Compression: Architecture Modification	48
4.4	Inference Framework	50
4.5	Compression: Quantization	51
4.6	Hungarian Matching Scheduler Performance Result.....	52
4.6.1	Hyperparameter Testing on Hungarian Matching Scheduler	54
4.7	Statistical Test	56
4.7.1	Effect of Hungarian Matching Scheduler on Spatial Accuracy	56
4.7.2	Effect Compression on Performance	58
4.8	Research Evaluation	59
4.9	Research Limitations	60
CHAPTER V	Conclusion and Future Work.....	62
5.1	Conclusion	62
5.2	Future Work	63
