HALAMAN JUDUL	i
HALAMAN PENGESAHAN.....	ii
HALAMAN MOTTO.....	iii
KATA PENGANTAR.....	iv
NASKAH SOAL TUGAS AKHIR.....	vi
INTISARI	vii
DAFTAR ISI.....	viii
DAFTAR GAMBAR.....	xiii
DAFTAR TABEL.....	xv
BAB I PENDAHULUAN	
1.1. Latar Belakang Masalah.....	1
1.2. Perumusan Masalah.....	3
1.3. Pembatasan Masalah.....	3
1.4. Tujuan dan Manfaat Perencanaan.....	4
1.4.1. Tujuan Perencanaan.....	4
1.4.2. Manfaat Perencanaan.....	4
1.5. Metode Pengumpulan Data	4
1.5.1. Study Literatur	4
1.5.2. Konsultasi.....	4
1.6. Sistematika Penulisan.....	5
BAB II LANDASAN TEORI	
2.1. Pembagian Jenis Pesawat Terbang.....	7
2.2. Jet Transport	9
2.2.1. Permulaan Transport Aircraft.....	9
2.2.2. Pasca Perang Dunia II.....	10
2.2.3. Kemunculan Jet Transport.....	11
2.2.4. Perspektif Perkembangan Transport Aircraft.....	12
2.3. Teknologi Jet Transport Boeing 777-200.....	14
2.3.1. Perancangan dengan komputer.....	14
2.3.2. Fly-by-wire.....	15
2.3.3. Cursor Komputer.....	15
2.4. Desain Pesawat Terbang.....	16
2.4.1. Conceptual Design.....	18
2.4.2. Preliminary Design.....	18
2.4.3. Detail Design.....	19
2.5. Civil Airworthiness dan Operational Rules.....	20
2.5.1. Federal Aviation Regulation.....	21
2.5.2. British Civil Airworthiness Requirements.....	21
2.6. Airfoil and Wing Geometry	21

2.6.1. Airfoil	21
2.6.1.1. Airfoil Lift and Drag	21
2.6.1.2. Airfoil Family	22
2.6.1.3. Airfoil Thickness Ratio	24
2.6.2. Wing Geometry	26
2.6.2.1. Aspect Ratio	27
2.6.2.2. Wing Sweep	29
2.6.2.3. Taper ratio	31
2.6.2.4. Twist	33
2.6.2.5. Wing Incidence	35
2.6.2.6. Dihedral	35
2.6.2.7. Wing Vertical Location	36
2.6.2.8. Wing Tip	36
2.7. Tail Geometry and Arrangement	40
2.7.1. Fungsi Tail	42
2.7.1.1. Trim	42
2.7.1.2. Stabilitas	42
2.7.1.3. Kontrol	42
2.7.2. Tail Arrangement	43
2.7.3. Tail Arrangement untuk Spin Recovery	43
2.7.4. Tail Geometry	46
2.7.4.1. Aspect Ratio dan Taper Ratio	48
2.7.4.2. Sweep	48
2.7.4.3. Thickness Ratio	48
2.8. Engine	49
2.8.1. Piston Engine	49
2.8.2. Jet Engine	50
2.8.2.1. Turbojet	51
2.8.2.2. Turbofan	51
2.8.2.3. Turboprop	52
2.8.2.3. Turboshaft	53
2.9. Landing Gear	55
2.9.1. Tricycle	55
2.9.2. Quadrycycle	55
2.9.3. Multi-Bogey	56

BAB III PEMBATASAN MASALAH

3.1. Pemilihan Airfoil dan Geometri Sayap	57
3.1.1. Pemilihan Airfoil	58
3.1.1.1. Stall	58
3.1.1.2. Airfoil Thickness Ration	60
3.1.1.3. NACA-airfoil	61
3.1.2. Pemilihan Geometry Sayap	62
3.1.2.1. Pemilihan Aspect Ratio	62
3.1.2.2. Pemilihan Wing Sweep	64
3.1.2.3. Pemilihan Taper Ratio	65

3.1.2.4. Pemilihan Twist.....	65
3.1.2.5. Pemilihan Wing Incidence.....	66
3.1.2.6. Pemilihan Dihedral.....	66
3.1.2.7. Pemilihan Wing Vertical Location.....	66
3.1.2.8. Pemilihan Wing Tip.....	67
3.2. Pemilihan Tail Geometry and Arrangement.....	67
3.2.1. Pemilihan Tail Arrangement.....	67
3.2.2. Pemilihan Tail Geometry.....	67
3.2.2.1. Horizontal tail.....	68
3.2.2.2. Vertical tail.....	68
3.3. Pemilihan Engine.....	69
3.4. Pemilihan Tanki Bahan Bakar.....	70
3.5. Pemilihan Landing Gear.....	71
3.6. Perhitungan Thrust to Weight Ratio dan Wing Loading.....	72
3.6.1. Perhitungan Thrust to Weight Ratio.....	72
3.6.2. Perhitungan Wing Loading.....	74
3.7. Rangkuman Data dan Pembatasan Masalah.....	79

BAB IV PERHITUNGAN BERAT, DIMENSI DAN PUSAT GRAVITASI

4.1. Perhitungan Takeoff Gross Weight.....	81
4.1.1. Rubber Engine Sizing.....	82
4.1.1.1. Menentukan Nilai W_{crew} dan $W_{max load}$	82
4.1.1.2. Perhitungan Fuel Weight Fraction.....	83
4.1.1.3. Perhitungan Empty Weight Fraction.....	88
4.1.2. Perhitungan Take off Gross Weight.....	89
4.2. Dimensi.....	89
4.2.1. Fuselage.....	89
4.2.2. Wing.....	89
4.2.3. Horizontal Tail.....	90
4.2.4. Vertical Tail.....	91
4.2.5. Kargo.....	93
4.2.6. Tangki Bahan bakar.....	93
4.3. Pusat Gravitasi.....	96
4.3.1. Perhitungan Berat Tiap Bagian Pesawat.....	96
4.3.2. Menentukan Lokasi Pusat Gravitasi.....	108

BAB V AERODINAMIKA DAN PROPULSI

5.1. Lift dan Drag.....	113
5.1.1. Lift.....	113
5.1.2. Drag.....	116
5.2. Perhitungan Koefisien Lift.....	119
5.3. Menentukan Koefisien Drag.....	128
5.3.1.1. Metode Equivalent Skin Friction.....	128
5.3.1.2. Metode Component Buildup.....	130

5.3.1.3. Perhitungan Parasite Drag Coeficient.....	130
5.3.2. Induced Drag.....	149
5.4. Propulsi.....	150

BAB VI ANALISA STABILITAS DAN KONTROL

6.1. Stabilitas	
6.1.1. Stabilitas Statis	152
6.1.2. Stabilitas Dinamis	152
6.1.3. Sistem Koordinat	154
6.2. Stabilitas Statis Longitudional	154
6.2.1. Stabilitas Statis Longitudional menurut Nicolai	155
6.2.2. Stabilitas Statis Longitudional menurut Perkins	156
6.2.3. Stabilitas Statis Longitudional menurut Raymer	158
6.2.4. Perhitungan Stabilitas Statis Longitudional	159
6.3. Stabilitas Statis Lateral Directional	164
6.4. Trim Analysis	167
6.5. Stabilitas Dinamis	170
6.5.1. Aircraft Dynamic Characeristic	175
6.6. Spin Recovery.....	176
	178

BAB VII PERHITUNGAN AIRCRAFT LOAD

7.1. Pendahuluan	
7.1.1 Jenis-jenis Beban	185
7.1.2 Factor of Safety	185
7.2. Manuver dan Gust Load	187
7.2.1. Manuver Load	187
7.2.2. Perhitungan Manuver Load Factor	187
7.2.3. Gust Load	188
7.2.4. Perhitungan Gust Load Factor	191
7.3. Lifting Surface Load	194
7.3.1. Classical Lifting Line Theory	195
7.3.2. Perhitungan Distribusi Lift Ideal	196
7.4. Landing Gear dan Inertia Load	197

BAB VIII PEMILHAN BAHAN DAN ANALISA STRUKTUR

8.1. Bahan	200
8.1.1. Kayu	200
8.1.2. Alumunium	201
8.1.3. Baja	202
8.1.4. Titanium	203
8.1.5. Magnesium	203
8.1.6. Paduan Nikel Temperatur Tinggi	206
8.1.7. Komposit	206
8.1.8. Pemilihan Bahan	209
8.2. Struktur	212
8.2.1. Struktur Fuselage	213

8.2.2. Struktur Wing	214
8.3. Analisis Struktur	216
8.3.1. Analisa Struktur Wing	216
8.3.2. Analisa Struktur Fuselage	225
BAB IX PERHITUNGAN BIAYA	
9.1. Biaya RDT & E dan Produksi	231
9.2. Biaya Operasi dan Perawatan	231
9.3. Perhitungan Biaya	233
9.3.1. Biaya RDT & E dan Produksi	233
9.3.2. Biaya Operasi dan Perawatan	235
9.4. Analisis Break-Even Point (BEP)	237
BAB X DESAIN INTERIOR BOEING 777-200	
10.1. Passenger Compartement (Ruang Penumpang).....	241
10.1.1. Interior Configuration.....	247
10.1.2. Interior flexibility.....	246
10.1.3. Overhead Stowage.....	246
10.2. Perencanaan Interior.....	247
BAB XI PENUTUP	248
DAFTAR PUSTAKA	
DAFTAR LAMPIRAN	

DAFTAR GAMBAR

Gambar

2.1. Speed history of transport aircraft.....	12
2.2. Growth of airplane passanger capacity.....	13
2.3. Design wheel.....	16
2.4. Fase-fase desain.....	17
2.5. Airfoil geometry.....	22
2.6. Airfoil flowfield & circulation.....	23
2.7. Efek chamber pada separasi.....	24
2.8. Macam-macam airfoil.....	25
2.9. Laminar airfoil.....	26
2.10. Wing geometry.....	27
2.11. Wing sweep Λ	28
2.12. Efek AR pada lift.....	29
2.13. Maximum lift to drag ratio trends.....	30
2.14. Efek Wing sweep pada picthup.....	32
2.15. Elliptical Wing.....	34
2.16. Efek taper ratio pada distribusi lift.....	34
2.17. High wing.....	37
2.18. Mid wing.....	39
2.19. Low wing.....	40
2.20. Wing tips.....	41
2.21. Aft tail variation.....	45
2.22. Variasi lain dari konfigurasi tail.....	46
2.23. Tail geometry untuk spin recovery.....	47
2.2.4. Sistem propulsi.....	53
2.2.5. Batas kecepatan sistem propulsi.....	54
2.2.6. Specific fuel consumption trends.....	54
2.2.7. Susunan landing gear.....	56
3.1. Macam-macam stall.....	59
3.2. Thickness ratio historical trends.....	61
3.3. Wing sweep historical trends.....	65
3.4. Maximum lift coefficient.....	76
3.5. Takeoff distance estimation.....	77
4.1. Typical mission profile.....	84
4.2. Cargo container.....	93
4.3. A_{top} dan A_{side} dari fuselage.....	100
4.4. Wheel load geometry.....	110
5.1. Origin of aerodynamic force.....	112
5.2. Perpaduan gaya-gaya aerodinamika.....	112
5.3. Wing lift curve.....	114
5.4. Efek mach number pada lift curve slope.....	114
5.5. $A_{flapped}$ dan $A_{exposed}$ dari wing.....	120
5.6. Empirical corection for flap lift increment.....	124

5.7. Theoretical lift increment.....	125
5.8. Pusat tekanan untuk penambahan lift karena flap.....	125
5.9. A_{exposed} dari vertical dan horizontal tail.....	127
5.10. Posisi $(c/4)_{\text{root}}$ pada airfoil.....	128
5.11. Aircraft wetted area ratio.....	129
5.12. Fuselage upsweep.....	145
6.1. Stabilitas Statis dan dinamis.....	153
6.2. Sistem kordinat pada aircraft.....	155
6.3. Sistem koordinat longitudinal menurut Nicolai.....	157
6.4. Stabilitas statis longitudinal menurut Perkins.....	158
6.5. Stabilitas statis longitudinal menurut Raymer.....	160
6.6. Downwash estimation.....	162
6.7. Typical pitching moment derivative values.....	167
6.8. Lateral geometry.....	168
6.9. Rudder geometry.....	169
6.10. Upwash estimation (subsonic).....	173
6.11. Gaya-gaya pada saat spin.....	179
6.12. Spin recovery criteria.....	181
6.13. Geometry for spin recovery estimation.....	183
6.14. Luasan A_F dan A_{fin}	183
7.1. Aircraft load.....	186
7.2. Manuver load V-n.....	190
7.3. Vertical gust load.....	191
7.4. Gust Load factor.....	194
7.5. Combined V-n diagram.....	194
7.6. Classical lifting line.....	196
8.1. Composite material types.....	208
8.2. Aplikasi bahan komposite pada comercial airplane.....	211
8.3. Span loading untuk pengurangan berat.....	213
8.4. Struktur fuselage.....	214
8.5. Struktur wing carrythrough.....	215
8.6. Wing structure analysis.....	217
8.7. Wing shear flow.....	220
8.8. Wing stresses and shears flow.....	225
8.9. Gaya-gaya pada fuselage.....	225
8.10. Penampang fuselage pada STA 1296.....	226
9.1. Grafik BEP.....	240
10.1. Commercial passenger allowance.....	241
10.2. Interior Arrangement (-200).....	243
10.3. Interior Boeing 747-400.....	244
10.4. Interor Boeing 767.....	245
10.5. Interior flexibility.....	246
10.1. Overnead Stowage Bins.....	246

DAFTAR TABEL

Tabel

2.1. Dihedral guidelines.....	36
2.2. Tail aspect ratio and taper ratio.....	48
3.1. Karakteristik airfoil.....	62
3.2. Aspect ratio.....	63
3.3. Pembatasan masalah.....	80
4.1. Average payload.....	83
4.2. Total payload.....	83
4.3. Weight estimation fudge factor.....	96
4.4. Pusat gravitasi.....	110
5.1. Drag terminology matrix.....	117
5.2. Equivalent skin friction coefficient.....	129
5.3. Skin roughness value (K).....	132
5.4. Landing gear component drag.....	135
6.1. Non dimensional radi of gyration.....	176
7.1. Aircraft load factor.....	186
7.2. Limit load factor.....	187
7.3. Manuver load factor.....	190
7.4. Gust load factor.....	193
8.1. Properti kayu.....	201
8.2. Properti bahan logam.....	204
8.3. Perbandingan aileron komposit dan alumunium pada Lockheed L-1001.....	209
8.4. Composite vs conventional materials.....	209
8.5. Properti bahan komposit.....	210
10.1. Typical passenger compartement data.....	242
