

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	iv
TABLE OF CONTENTS	v
LIST OF TABLES	vii
LIST OF FIGURES	viii
ABSTRACT	ix
INTISARI	x
CHAPTER 1	1
INTRODUCTION	1
1.1. Background	1
1.2. Problem statement	3
1.3. Research questions	4
1.4. Research objectives	4
1.5. Motivation	4
1.6. Research benefits	5
1.7. Research contribution	5
1.8. Scope and limitation of research	6
1.9. Writing systematics	7
CHAPTER 2	9
LITERATURE REVIEW	9
2.1. Theoretical framework	9
2.2. The context of health in indonesia	16
2.3. Empirical literature review	21
2.4. Research hypotheses	26
CHAPTER 3	27
RESEARCH METHODOLOGY	27
3.1. Research design	27
3.2. Operational definition of variables	30
3.3.1. Variables of interest	30
3.3.2. Covariates	33
3.3. Population and sample	37
3.4. Research instruments	38
3.5. Data collection technique	38
3.6. Data analysis technique	39
3.6.1. Principal components analysis	39
3.6.2. Spatial weights matrix	42

3.6.3. Spatial autocorrelation tests	45
3.6.4. Multicollinearity test.....	48
3.6.5. Panel model selection	48
3.6.6. Spatial model selection	50
3.6.7. Panel estimation	54
3.6.8. Direct & indirect effects	55
3.6.9. Information criterion.....	56
3.6.10. Robustness checks	56
3.6.11. Heterogeneity analysis	57
CHAPTER 4.....	58
RESULTS AND DISCUSSION	58
4.1. Perceived Health Problems Index construction	58
4.2. Descriptive analysis	63
4.3. Exploratory spatial data analysis (ESDA)	71
4.3.1. Global spatial autocorrelation tests	71
4.3.2. Local spatial autocorrelation tests	73
4.3.3. Nonspatial models	79
4.3.4. Spatial models	82
4.3.4.1 Diagnostic tests for model specification	82
4.3.4.2 Spatial model regressions	85
4.3.4.3 Marginal Effects	90
4.3.4.4 Heterogeneity analysis	96
4.3.4.5 Robustness checks	97
4.3.4.5 Comparison to life expectancy at birth	102
CHAPTER 5.....	105
CONCLUSION.....	105
5.1. Summary	105
5.2. Research limitations	106
5.3. Policy recommendations	107
REFERENCES	109
APPENDICES	121

LIST OF TABLES

Table 3.1 Variables used for health outcomes index construction	36
Table 3.2 Variables used in this study	36
Table 3.3 Direct and indirect effects of spatial models	55
Table 4.1 Descriptive statistics of Perceived Health Problems Index components	59
Table 4.2 Kaiser–Meyer–Olkin (KMO) and Barlett’s test.....	60
Table 4.3 Descriptive statistics	66
Table 4.4 Global spatial autocorrelation tests for Perceived Health Problems Index	72
Table 4.5 Global spatial autocorrelation tests for life expectancy	73
Table 4.6 Panel model selection	79
Table 4.7 VIF test	79
Table 4.8 Nonspatial model regressions	80
Table 4.9 Spatial model selection diagnostic tests	83
Table 4.10 Spatial LR tests	84
Table 4.11 Maximum Likelihood spatial model regressions	85
Table 4.12 Generalized moments spatial model regressions	89
Table 4.13 Direct and indirect of Perceived Health Problems Index	95
Table 4.14 Direct and indirect impacts by region	97
Table 4.15 Robustness check by omitting covariates	98
Table 4.16 Direct and indirect of Perceived Health Problems Index using temporally lagged public health expenditure	100
Table 4.17 Robustness check by alternative weights matrices	101
Table 4.18 Comparison check using life expectancy as the dependent variable.	104

LIST OF FIGURES

Figure 3.1 Research design flowchart.....	28
Figure 3.2 Main spatial model selection flowchart	29
Figure 3.3 The illustration of how government health expenditure affects health	29
Figure 3.4 Rook and queen contiguity matrices, respectively	43
Figure 4.1 Scree Plot of Eigenvalue	62
Figure 4.2 Contribution of Variables to the First Dimension (PC1)	62
Figure 4.3 PCA Variable Correlation Plot	63
Figure 4.4 Distribution of Perceived Health Problems Index in Indonesia, 2019 – 2021.....	69
Figure 4.5 Distribution of life expectancy at birth in Indonesia, 2019 – 2021	70
Figure 4.6 Local Moran’s I of Perceived Health Problems Index, 2019 – 2021...	75
Figure 4.7 Local Geary’s C of Perceived Health Problems Index, 2019 – 2021 ..	76
Figure 4.8 Local Moran’s I of life expectancy, 2019 – 2021	78
