I. Research Question	21

CHAPTER III. RESEARCH METHOD.....	22
A. Research Type and Design	22
B. Research Settings and Time.....	22
C. Research Subjects	23
1. Population	23
D. Identification Research Variables.....	26
E. Data Collection and Research Instrument	28
F. Data Analysis.....	29
1. Organizing the Data	29
2. Systematic Coding in Spreadsheet Format	29
3. Developing a Codebook Based on Spreadsheet Coding.....	29
4. Theme Development Through Spreadsheet Grouping	30
5. Reviewing and Refining Themes Collaboratively	30
6. Interpretation and Integration with Theoretical Framework.....	30
7. Use of Spreadsheet as a Qualitative Analysis Tool	30
G. Subjectivity of Researchers	31
H. Trustworthiness and Credibility	31
I. Research Ethics.....	32
J. Research Team.....	32
CHAPTER IV. RESULTS AND DISCUSSION.....	34
A. Results	34
1. Characteristics of Respondents	34
2. Overview of Mobile of Screening for NCDs in Batu City	35
3. Acceptability of Implementation	37
4. Barrier of Implementation.....	40
5. Facilitator of Implementation	48
6. Mapping Barrier and Facilitator Accros Respondents.....	55
B. Discussion.....	62
C. Limitation of the Study.....	69
CHAPTER V. CONCLUSION.....	71
A. Conclusion.....	71
B. Recommendation	72

DECLARATION OF AUTHENTICITY

I, the undersigned, hereby declare that this thesis manuscript, titled *“Understanding the Implementation of Mobile Screening for Noncommunicable Disease in Community Health Centers: Qualitative Study in Batu City, Indonesia”*, is the result of my original research work and represents my own intellectual contributions, except where otherwise acknowledged, to fulfill the purposes and objectives of this study. I further confirm that this work has not been submitted for any other degree or examination in any institution or university, nor has it been previously published in any form. All sources of information and references used in this thesis have been duly acknowledged, and any assistance received from individuals or organizations in the completion of this research has been acknowledged and appropriately credited. By signing this declaration, I affirm the authenticity and integrity of this thesis manuscript.

Siti Mei Saroh

ACKNOWLEDGMENT

All praise is due to Allah SWT, the Most Gracious and the Most Merciful, whose blessings, guidance, and mercy have enabled me to complete this thesis. Peace and blessings be upon the Prophet Muhammad SAW, whose teachings continue to inspire the pursuit of knowledge and service to humanity.

I am honored to present this thesis, which marks the culmination of my academic and research journey in the field of Public Health, with a focus on International Health. This study, titled "*Understanding the Implementation of Mobile Screening for Noncommunicable Disease in Community Health Centers: A Qualitative Study in Batu City, Indonesia*" has enabled me to explore the practical complexities of health service delivery, policy implementation, and community engagement. I sincerely hope that the findings and recommendations shared in this thesis will contribute meaningfully to the advancement of NCD screening efforts and the broader public health system in Indonesia.

First and foremost, I would like to express my deepest gratitude to my supervisors, Tony Arjuna, S.Gz., M.Nut.Diet., AN., APD., Ph.D., and dr. Ahmad Watsiq Maula, MPH, for their invaluable guidance, insightful feedback, and unwavering support throughout the course of this research. Their academic rigor and mentorship have played a critical role in shaping both this thesis and my growth as a researcher.

I would also like to extend my heartfelt appreciation to the examiners and all lecturers of the Master of Public Health Program at the Faculty of Medicine, Public Health, and Nursing, Universitas Gadjah Mada. Their dedication to academic excellence and commitment to advancing public health knowledge have greatly enriched my academic experience.

I am especially thankful to the **Indonesia Endowment Fund for Education (LPDP)** of the Ministry of Finance, Republic of Indonesia, for generously funding my studies. Without this scholarship, pursuing this academic and research endeavor would not have been possible.

My sincere thanks go to the key informants who participated in this study including healthcare providers, program coordinators, heads of Puskesmas, cadres,

and community members in Batu City who generously shared their time, experiences, and perspectives. Their contributions were instrumental to the depth and quality of this research.

To my beloved parents, Kusnadi and Dewi Sriati, who have shown that sincere prayers, unconditional love, and patience are just as important as tangible support in helping me achieve this journey.

I am also grateful to my brother and sister-in-law, who supported me throughout this journey, and to my nephews, Razka and Rizky, who brought joy during challenging times. May my journey inspire you to reach even greater heights.

To my best friends and everyone who believed in my potential, your support gave me the courage to embark on this postgraduate program and the motivation to persevere.

I am particularly grateful to the Puskesmas teams and the Batu City Health Office staff for their cooperation during the data collection phase. Their support in facilitating interviews, coordinating schedules, and providing contextual information was vital to the successful execution of this study.

I would also like to thank my fellow classmates-International Health batch 2023, academic peers, and friends in the public health community. Your intellectual camaraderie, support, and encouragement have been invaluable throughout this journey. The collaborative learning environment we shared has helped broaden my perspectives and deepen my understanding.

Lastly, I hope this research will contribute to ongoing efforts to enhance community-based health interventions and promote equitable access to noncommunicable disease screening in Indonesia. As we navigate an evolving public health landscape, I believe implementation research grounded in local realities will be essential in building stronger, healthier communities.

To all who have supported me in this endeavor thank you.
