

## TABLE OF CONTENTS

Approval Sheet of Supervisor .....	ii
Approval Sheet of Examiner.....	iii
Plagiarism Statement .....	iv
Preface .....	vi
Table of Contents .....	vii
List of Tables.....	ix
List of Figures .....	x
Intisari .....	xiii
Abstract.....	xiv
CHAPTER 1 Introduction .....	1
1.1. Research Background .....	1
1.2. Research Problems.....	4
1.3. Research Novelty .....	4
1.4. Research Aims .....	7
1.5. Research Benefits.....	7
CHAPTER 2 Literature Review .....	8
2.1. Literature Review.....	8
2.1.1. CO <sub>2</sub> Adsorption.....	8
2.1.2. Graphene Oxide .....	10
2.1.3. Porous Graphene.....	13
2.2. Theoretical Framework.....	15
2.2.1. Many-Body Problem.....	15
2.2.2. Density Functional Theory .....	16
2.2.3. Graphene Oxide Mechanism.....	17
2.2.4. CO <sub>2</sub> Adsorption Mechanism .....	19
2.3. Research Hypothesis.....	20
CHAPTER 3 Methodology.....	21
3.1. Computational Tools .....	21
3.2. Material Structures.....	22
3.3. Computational Details .....	23

CHAPTER 4 Results and Discussion .....	25
4.1. Optimized Structure of Different Pore Sizes and Functional Groups.....	25
4.2. CO <sub>2</sub> Adsorption on Individual Porous Structure and Functional Group.....	27
4.3. CO <sub>2</sub> Adsorption on a Combination of Pores with Functional Groups .....	30
4.4. Analysis of CO <sub>2</sub> Adsorption Behavior of Combination Structures .....	36
4.4.1. Density of States .....	39
4.4.2. Molecular Orbital.....	42
4.4.3. Charge Density Difference.....	46
CHAPTER 5 Conclusion .....	49
5.1. Summary .....	49
5.2. Suggestion.....	49
References.....	51
APPENDIX A The Optimized Structure.....	57
APPENDIX B Density of States.....	63
