

LIST OF CONTENTS

STATEMENT OF PLAGIARISM-FREE WORK.....	iii
PREFACE.....	iv
LIST OF CONTENTS	v
LIST OF TABLE.....	vii
LIST OF FIGURE.....	viii
LIST OF ATTACHMENT.....	ix
INTISARI	x
ABSTRACT	xi
I. INTRODUCTION	1
1.1 Background.....	1
1.2 Research Objectives	3
1.3 Advantages of Research	3
1.4 Research Originality.....	4
II. LITERATURE REVIEW AND THEORETICAL BASIS.....	6
2.1 Literature Review	6
2.1.1 Soil Fauna Biodiversity.....	6
2.1.2 The Role of Earthworms in Soil	7
2.1.3 Epigeic Earthworm	8
2.1.4 Soil Water.....	10
III. MATERIALS AND METHOD	12
3.1 Materials and Equipment.....	12
3.2 Times and Site Research	12
3.3 Research Procedure	12
3.3.1 Soil Sampling	13
3.3.2 Separation and Classification of Aggregate Sizes, Plant Roots, and Litter	14
3.3.3 Laboratory Experimental.....	15
3.4 Statistical Analysis.....	20
IV. RESULT AND DISCUSSION	21
4.1 Results	21
4.1.1 Soil Animal Biodiversity	21
4.1.2 Soil Animals Body Length.....	23
4.1.3 Soil Aggregates, Roots and Litters Distribution.....	24

4.1.4	Soil Aggregates Size at the End of Experiment	25
4.1.5	Earthworm Biomass on Soil Aggregates Size.....	26
4.1.6	Soil Water Content in Different Aggregates at the End of Experiment 27	
4.1.7	Earthworm Biomass on Soil Water Content.....	28
4.2	Discussion.....	29
4.2.1	The Effect of Soil Animal Biodiversity on the Distribution of Soil Particles, Roots, and Litter in Flat and Moderately Sloping Areas	29
4.2.2	The Effect of Earthworm Activity and Biomass on Soil Aggregate Size Across Different Particle Scales	31
4.2.3	The Effect of Earthworm Activity and Biomass on Soil Water Content at Varying Aggregate Size	34
V.	CONCLUSION AND SUGGESTION.....	36
5.1	Conclusion	36
5.2	Suggestion	36
	REFERENCES.....	37
	ATTACHMENT.....	43
