

TABLE OF CONTENTS

PREFACE.....	iv
TABLE OF CONTENTS.....	vi
LIST OF TABLES.....	ix
LIST OF FIGURES.....	x
ABSTRACT.....	xii
INTISARI.....	xiii
I. INTRODUCTION.....	1
1.1. Background.....	1
1.2. Statement of Problems.....	3
1.3. General Objectives.....	4
1.4. Expected Outcomes.....	4
1.5. Originality.....	4
II. LITERATURE REVIEW, THEORITICAL FRAMEWORK AND HYPOTHESIS.....	5
2.1. Literature Review.....	5
2.1.1. Banana.....	5
2.1.2. Fusarium Wilt of Banana.....	6
2.1.3. Foc TR4.....	9
2.1.4. Driving Factors of Fusarium Wilt Disease Development.....	9
2.1.5. Fusarium Wilt Disease Control.....	12
2.1.6. Soil Bacterial Community Analysis.....	13
2.1.7. Synthetic Microbial Community.....	15
2.2. Theoritical Framework.....	16
2.2.1. Hypothesis.....	17
III. RESEARCH METHODOLOGY.....	18
3.1. Materials and Equipments.....	18
3.2. Time and Locations.....	19
3.3. Diagram of Research Methodology.....	19
3.4. Research Design.....	20
1. Survey and Sampling Location of Banana Farms in Yogyakarta Province.....	20

1.1. Site Selection.....	20
1.2. Sampling.....	21
2. Experiment 1 (The Correlation between Soil Physicochemical Properties and Fusarium Wilt Disease Incidence in Yogyakarta Province).....	22
2.1. Determination of disease incidence in each locations.....	22
2.2. Soil physicochemical properties analysis.....	22
2.3. Selection of soil physicochemical properties correlated with disease incidence.....	23
3. Experiment 2 (Association of Soil Bacterial Diversity and Composition with Fusarium Wilt Disease Incidence of Bananas in Yogyakarta Province, Indonesia).....	23
3.1. Selection of Locations Representing the Four Regions In Yogyakarta Province.....	23
3.2. Soil DNA Extraction and Sequencing.....	24
3.3. Quality Control and Host DNA Removal.....	24
3.4. Taxonomic Profiling and Diversity Analysis.....	25
3.5. Bacterial Co-occurrence Network Analysis.....	25
3.6. Core Microbiome and Differential Abundance Analysis.....	25
3.7. Foc TR4 Quantification.....	25
3.8. Statistical Analysis.....	26
4. Experiment 3 (The Effectiveness of Soil Bacterial Taxa Againsts Foc TR4 was Evaluated both In Vitro and In Vivo for The Design of the Syncom).....	26
4.1. Isolation and Purification of Soil Bacterial.....	26
4.2. Antifungal Activity of Selected Isolates Againsts Foc BNT-2.....	27
4.3. Morphological and Molecular Identification of Selected Isolates.	27
4.3.1. Morphological Identification.....	27
4.3.2. Molecular Identification.....	27
4.4. Secreenhouse Experiment.....	28
4.4.1. Preparation for Planting Media.....	28
4.4.2. Selected Bacterial Isolate Propagation.....	28
4.4.3. Foc BNT-2 Propagation.....	28

4.4.4. Pot Experiment.....	28
4.4.5. Statistical Analysis.....	29
3.5. Data Collection.....	30
IV. RESULTS AND DISCUSSION.....	33
4.1. Experiment 1 (The Correlation between Soil Physicochemical Properties and Fusarium Wilt Disease Incidence in Yogyakarta Province.....	33
4.1.1. Disease Incidence in each Regions.....	33
4.1.2. Soil Physicochemical Analysis in each Regions.....	33
4.1.3. Selection of Soil Physicochemical Properties Correlated with Disease Incidence.....	34
4.1.4. Discussion.....	36
4.2. Experiment 2 (Association of Soil Bacterial Diversity and Composition with Fusarium Wilt Disease Incidence of Bananas in Yogyakarta Province, Indonesia).....	39
4.2.1 Soil Physicochemical Properties.....	39
4.2.2. Foc TR4 Quantification.....	40
4.2.3. Diversity of Bacterial Communities.....	41
4.2.4. Taxonomic Composition of Bacterial Communities.....	43
4.2.5. Co-occurrence Network Analysis.....	44
4.2.6. Core Microbiome and Differential Abundance Analysis.....	45
4.2.7. Discussion.....	49
4.3. Experiment 3 (The Effectiveness of Soil Bacterial Taxa Againsts Foc TR4 was Evaluated both in Vitro and In Vivo for The Design of the Syncom.....	56
4.3.1. Exploration and Isolation of Bacterial Isolates.....	56
4.3.2. Screening of Antagonistic Bacteria.....	56
4.3.3. Identification of Selected Isolates.....	58
4.3.4. Pot Experiment.....	59
4.3.5. Discussion.....	63
V. CONCLUSSION AND RECOMMENDATION.....	65
REFERENCESS.....	67
APENDIX.....	78
