ABSTRACT	xviii
INTISARI	xx
CHAPTER I INTRODUCTION	1
I.1 Background.....	1
I.2 Problem Formulation.....	4
I.3 Novelty	4
I.3.1 Research novelty from the material and product.....	5
I.3.2 Research novelty from the strategies to explore the new peptide sequences	6
I.4 Research Objectives	7
I.4.1 General objectives	7
I.4.2 Specific objectives.....	8
I.5 Research Benefit.....	8
CHAPTER II LITERATURE REVIEW AND HYPOTHESIS FORMULATION	9
II.1 Literature Review	9
II.1.1 <i>Chondrus crispus</i> macroalgae.....	9
II.1.2 Antimicrobial peptides and their characteristics.....	10
II.1.3 AMP mechanism of action against bacteria.....	12
II.1.4 Exploration of AMPs using conventional methods	15
II.1.5 Exploration of AMPs using the virtual screening method	17
II.1.6 Rational antimicrobial peptide design.....	18
II.1.7 Unnatural amino acids	22
II.2 Hypothesis Formulation	24
II.2.1 Hypothesis I	24
II.2.2 Hypothesis II	24
II.2.3 Hypothesis III.....	25
II.2.4 Hypothesis IV	26
II.2.5 Research Design.....	27
CHAPTER III RESEARCH METHOD	30
III.1 Materials and Instruments.....	30

III.1.1	Materials	30
III.1.2	Instruments	31
III.2	Research Procedure.....	32
III.2.1	Conventional antimicrobial peptide screening	32
III.2.2	Virtual antimicrobial peptide screening.....	35
III.2.3	Development of new AMP from <i>Chondrus crispus</i>	37
III.2.4	Unnatural amino acid modification of new AMP from <i>Chondrus crispus</i>	41
CHAPTER IV	RESULTS AND DISCUSSIONS	43
IV.1	Discovery of Antimicrobial Peptide Using Conventional Method: Solid Phase Extraction	43
IV.1.1	Extraction and hydrolysis of protein	43
IV.1.2	Fractionation of hydrolysate protein by solid phase peptide extraction	45
IV.1.3	Antimicrobial activity-assisted AMP screening.....	46
IV.1.4	Physicochemical properties analysis of the identified peptide from the active fraction.....	47
IV.1.5	Structure-activity relationship of candidate AMP P01....	53
IV.1.6	Molecular docking studies of the peptide from the active fraction	54
IV.2	Discovery of Antimicrobial Peptide using Virtual Screening ...	58
IV.2.1	Proteomic results: peptide clustering.....	58
IV.2.2	Physicochemical properties of candidate peptides	60
IV.2.3	Secondary structure of identified peptides from virtual screening.....	62
IV.2.4	Antibacterial activity of identified peptides from virtual screening.....	64
IV.2.5	Structure-activity relationship	64
IV.3	Development of amphipathic α -helical Antimicrobial Peptide from conventional screening	67
IV.3.1	Development of P01 peptide from conventional screening.....	67
IV.3.2	Development of CC1, CC2 and CC3 peptides from virtual screening	88
IV.4	Unnatural Amino Acid Modification of P01.3	109
IV.4.1	Design of unnatural derivative peptide.....	109
IV.4.2	Secondary structure of derivative peptide from virtual screening.....	111
IV.4.3	The effect of temperature on peptides' physical stability	114
IV.4.4	The effect of pH on peptides' physical stability	117
IV.4.5	Conformational study of UP013.....	119
IV.4.6	Antibacterial activity of derivative peptide from virtual screening.....	122
IV.4.7	Structure-activity relationship of unnatural residue peptide	124

CHAPTER V CONCLUSION AND SUGGESTION	128
V.1 Conclusions	128
V.2 Suggestion	129
